Andrew Yager

Andrew Yager is a Sustainable Energy Policy Advisor in the Environment and Energy Group at UNDP HQ in New York. He works on energy access, climate change mitigation and alternative energy issues.

He is the UNDP manager of the LP Gas Rural Energy Challenge, a public private partnership with the World Liquefied Petroleum Gas Association. The aim of this initiative is to increase access to LP Gas among the rural poor in developing countries. He also represents UNDP at the Global Bioenergy Partnership, an initiative of the G8, chaired by Italy and Mexico.

Dr. Yager moved to UNDP Headquarters from Nairobi, Kenya in 2003 where he managed an industrial energy efficiency project aimed at increasing sustainable industrial development and decreasing global carbon emissions. He previously spent 3 years in Luanda, Angola as Renewable Energy and Rural Electrification Advisor to the SADC Energy Sector.

Prior to joining UNDP, he was Head of the International Development Section at the Institute for Energy Technology in Norway.

He received his Ph.D. in Energy Policy and Engineering from the University of Colorado at Boulder in 1984.
