Japan's Comment on Industrial Development

- Japan sees importance in promotion of sustainable pattern of production of sustainable pattern of production and consumption as mentioned in IPM Chair's text, and in order to specify our intention I would like that text will include the word "Marakesh Process" in UN terminology and "3R initiative (reduce, reuse, recycle for sound material-cycle society) in other international initiatives term.
- Based on our ODA experience to developing countries, in trade related capacity building, it is essential to support the establishment and enhancement of trade related legal-system such as Civil Law, Trade Law, Registration Law, Cooperate-reorganization Law, Bankruptcy Law, and Anti-monopoly Law, where appropriate.
