| Additional information: | <p>A National Indicator Set of 192 indicators was developed to monitor the fulfillment of national priorities defined by the <i>Strategic Framework Czech Republic's 2030</i> (hereinafter "<i>Czech Republic 2030</i>") objectives. These indicators will primarily be used to measure progress at the level of 97 specific objectives of the <i>Czech Republic 2030</i> and have therefore been set with regard to the national context.</p> <p>The availability and relevance of the 2030 Agenda indicators is continually assessed by the Czech Statistical Office. The Czech Republic continuously works on new indicator set that will be related to the quality of life and will serve as input for the Sustainability and Quality of Life Reports which will be issued for the first time in 2020 as will assess and evaluate the <i>Czech Republic 2030</i>.</p> |
