g) **By X year, ensure that markets for agricultural products are functioning and accessible for all, especially for small-scale farmers and fishers, through reshaping of the relevant trade policies, including phasing out export and other harmful subsidies, and implement global measures to mitigate excessive food price volatility.**

**Focus area 3. Health and population dynamics**

**Healthy life at all ages for all**

a) by 2030 reduce the maternal mortality ratio to less than 40 per 100,000 live births\(^{17}\), end preventable new-born and child deaths and reduce by x% child and maternal morbidity\(^{18}\)

b) by 2030 **end, prevent, control, eliminate, and eradicate** the epidemics of **communicable diseases such as** HIV/AIDS, tuberculosis, malaria and neglected tropical diseases\(^ {19}\)

c) reduce by x% the risk of premature mortality from non-communicable diseases (NCDs), injuries and promote mental health with strong focus on prevention\(^ {20}\)

d) achieve **ensure access to** universal health coverage (UHC) **services**, including financial risk protection, with particular attention to the **poor and the** most marginalized vulnerable\(^ {21}\)

e) by 2030 ensure universal **availability and access to** affordable essential medicines, **including generic medicines, medical treatment** and vaccines for all,\(^ {22}\)

f) ensure universal access to **comprehensive** sexual and reproductive health for all, including modern methods of family planning **in accordance with the Programme of Action of ICPD**\(^ {23}\)

g) decrease by x% the number of deaths and illnesses from indoor and outdoor air pollution and other forms of environmental degradation\(^ {24}\)
h) Eliminate narcotic drug and substance abuse.

Appropriate means of implementation

a) Support research and development of vaccines and medicines for the common diseases of developing countries including countries in special situations;

b) Ensure affordable access to medicines, including through the use of TRIPS flexibilities, to enable the use and production of affordable generic medicines by 20xx;

c) Further collaboration and cooperation at the national and international levels to strengthen health systems through increased health financing, recruitment, development, training and retention of the health workforce, through improved distribution and access to safe, affordable, effective and quality medicines, vaccines and medical technologies, and by improving health infrastructure;

Focus area 4. Education and life-long learning

Provide inclusive quality education and life-long learning opportunities for all

a) by 2030 ensure universal, free, equitable access to and completion of quality primary and secondary education for all girls and boys, leading to effective learning outcomes;

b) ensure that people with disabilities have access to inclusive education, skills development and vocational training, as well as ensuring their access into labor markets by 2030;

b) by 2030, improve wastewater management, recycling and reuse by x%.
c) by 2030, improve water-use efficiency in all sectors, with particular focus on agriculture.
d) implement integrated water resource management, including appropriate trans-boundary co-operation\textsuperscript{59}

e) by 2030, bring fresh water extraction in line with sustainable supply, protect and restore ecosystems, to provide water-related services\textsuperscript{60}

f) by 2030, significantly improve water quality, eliminate reduce pollution and dumping of toxic materials in water bodies, and protect aquifers\textsuperscript{51}

g) invest in water harvesting and storage technologies, and double the rainwater harvested by 2030\textsuperscript{52}

h) decrease by \( x\% \) mortality and serious injuries, and decrease economic losses caused by water-related disasters by 2030\textsuperscript{53} \( \rightarrow \) moved to FA-10

i) provide adequate facilities and infrastructure for safe drinking water and sanitation systems in all areas

j) improve the waste-water and life garbage treatment rate by \( X\% \) by 2030

Appropriate means of implementation

a) support efforts in developing countries, including countries in special situations, on water and sanitation activities and programmes, through provision of financial resources, capacity-building and technology transfer;

b) expand international cooperation and support in water and sanitation related technologies for developing countries as well as countries in special situations, including among others, water harvesting and storage technologies, sewage treatment technologies, by 2030

Focus area 7. Energy

Ensure access to affordable, sustainable, and reliable modern energy services for all

a) by 2030 ensure universal access to sustainable modern energy services\textsuperscript{54}

b) double\textsuperscript{55} the share of renewable energy in the global energy mix by 2030 through enhanced partnership\textsuperscript{56}

c) double\textsuperscript{57} significantly raise the global rate of improvement in energy efficiency, including in buildings, industry, agriculture and transport, by 2030\textsuperscript{58}

d) by 2030 increase by \( x\% \) the share of clean and low or zero-emission energy technologies, including sustainable biomass and advanced cookstoves\textsuperscript{59}

e) by 2030 phase out fossil fuel subsidies\textsuperscript{60} that encourage wasteful consumption\textsuperscript{61}

f) ensure affordable access to energy-related know-how, science, technologies, and innovations for developing countries, including countries in special situations

g) ensure flexibility in the dissemination of modern energy technologies for developing countries, including countries in special situations

h) remove by 20xx, barriers that developing countries face or may face, in obtaining access to clean energy technologies
Appropriate means of implementation

a) encouraging public and private sector investment, in particular public-private partnerships, in relevant and needed cleaner energy technologies
b) encourage the use of TRIPS flexibilities in relation to promoting the use of environmentally sound energy technologies
c) strengthen international cooperation, including the provision of financial resources, building and technology transfer to developing countries to support their efforts towards universal energy access
d) enable greater access by developing countries to affordable access to clean energy technology, and in this regard, operationalize the UN Global Technology Facilitation Mechanism by 2017
e) remove by 20xx, barriers that developing countries face or may face, in obtaining access to clean energy technologies

Focus area 8. Economic growth, employment and infrastructure

Promote sustainable, inclusive and sustained economic growth and decent jobs for all

a) sustain income growth of the bottom 40% of the income distribution of each country to reduce income inequalities by 2030
b) achieve full equal and productive employment and decent work for all who seek employment including for marginalized groups by 2030

c) halve the number of youth not in employment, education or training by 2020

d) by 2030 improve by x% the energy and resource productivity of economic activities and reduce by y% their waste and emissions per unit of output

e) create appropriate climate for SMEs, entrepreneurship and innovation by 2020 and to support market development and the expansion of financial inclusion in developing countries at the national, regional and international levels

f) increase the share of high productivity sectors and activities in the economy, and strengthen productive capacities through technological upgrading and greater value addition, with a particular focus on LDCs

a bis) promote inclusive and sustainable industrial development.

b) create decent industrial sector jobs and promote job-rich industrial development

c) achieve high productivity levels across industrial sectors in all countries

d) by 2030 increase industrial diversity economic diversification towards industrialisation particularly in developing countries, with a focus on shifting towards higher value-added activities

e) by 2030, increase by x% the resource efficiency of industry, reduce by y% harmful chemicals used and waste generated, and decrease by z% the intensity of carbon emissions from the industrial sector
f) Increase by a factor of x the share of environmentally sustainable products and services in GDP.

g) By 2020 implement plans and measures to strengthen the technological capabilities of industrial sectors and in developing countries, including plans to accelerate development, transfer and adoption of environmentally sound industrial technologies and processes including cleaner fossil fuel technologies.

h) By 2030 retrofit x% of existing industries on global level based on energy and resource-efficient technologies and environmentally sound industrial processes, with developed countries taking the lead.

i) Developing countries to climb to the next stage of economic development by 2030.

j) Achieve sustained industrial development in developing countries, especially low income countries, by raising the share of manufacturing and upgrading industrial technology and capability.

k) Increase economic diversification in developing countries including by adding value to raw materials and commodities through domestic processing and manufacturing.

l) Promote endogenous technology development and the growth of domestic innovation in developing countries.

m) Ensuring adequate and favorable market access for industrial products and processed commodities of developing countries, including countries in special situations.

n) Ensuring that the outcomes of research and development and knowledge creation are accessible to developing countries, including countries in special situations.

o) Ensuring favourable market access for industrial products and processed commodities of developing countries, including countries in special situations.

p) Establish measures at global level to reduce inequality among countries.

q) Support developing countries, including countries in special situations, integrate into the global value chain, increase employment opportunities, achieve industrial upgrading and successfully avoid the middle-income trap.

Appropriate means of implementation

a) Ensure that international trade rules and regulations are consistent with the objectives of industrial development and technological progress in developing countries including countries in special situations in order to ensure equality of economic opportunities for all.

b) Strengthen international cooperation, including the provision of financial resources, capacity-building and technology transfer to developing countries including countries in special situations, in support of developing countries’ industrial development objectives.

c) Developing countries to be provided with international financing, technology and capacity building to enable them to develop their infrastructure.

d) Ensure that developing countries join the appropriate link of global value chain and benefit to eradicate poverty and realize the sustainable development.
Focus area 10. Sustainable cities and human settlements

Build inclusive, safe and sustainable cities and human settlements

a) By 2030, **ensure basically realize** universal access to adequate and affordable housing and basic services for all and eliminate slum-like conditions everywhere.
b) By 2030, provide access to safe, affordable, accessible and sustainable transport for all, **expand public transport**, improve road safety and urban air quality.
c) Enhance capacities of developing countries for integrated urban human settlement planning and management.
d) By 2030, reduce the ecological footprints of cities by x%.
e) By 2020, increase by x% the number of cities, rural and urban areas, adopting and implementing policies and plans towards resilience and adaptation to climate change and natural disasters.
e bis) promote inclusive, people-centered urbanization through optimizing urban planning and management, enhancing the carrying capacity and function of cities.

- **build resilience of the poor and reduce deaths and economic losses related to natural disasters (moved from FA-I-revision)**

f) By 2030 enhance social cohesion and personal security, and ensure universal access to inclusive and safe public spaces.
g) By 2030 ensure that all cities are accessible and offer opportunities to persons with disabilities.
h) Protect and safeguard the world’s cultural and natural heritage and improve the management ability of the employees in heritage related institutions.

Appropriate means of implementation

a) **provide developing countries, including countries in special situations, with enhanced international financing to enable them to promote sustainable human settlements**;
b) **support the development and improve the provision in particular in developing countries, including countries in special situations, of reliable and sustainable transport, including road and rail links, ports, air and trade routes, financial services and ICT connectivity**;
c) **assist developing countries, including countries in special situations, in enhancing their capacities and ensure affordable access to related know-how, science, technologies and innovations**;
Focus area 11. Sustainable Consumption and Production

Promote sustainable consumption and production patterns

a) by 2030 achieve **improve** sustainable management and use of natural resources;97
b) by 2030 reduce **major** waste by x% through prevention, reduction, recycling and reuse;98
c) improve the resource productivity of economic activities by x%; including through sustainable supply chains by 2030;100
d) by 2030 redouble efforts **implement policies** to raise awareness for creating a culture of sufficiency and sustainable lifestyles,101 including sustainability information on products and services, in particular in developed countries;
e) by 2020, encourage economic incentives **developed countries lead the implementation of policies** that promote sustainable consumption and production patterns including through a product life-cycle approach;103
f) by 2030 increase by x percentage points the share of companies in developed countries reporting on corporate social and environmental responsibility, including integrated reporting;
g) by 2030, all financial sector actors incorporate sustainable development principles in their business practices;106
h) create incentives for sustainable tourism.107

Appropriate means of implementation

a) by X year implement fully the 10 Year Framework of Programme (10YFP) on sustainable consumption and production, in which developed countries take the lead;
b) reduce per capita energy consumption in developed countries by x% by 20xx;
c) reduce per capita wastage of food at consumer level in developed countries by x% by 20xx;
d) promote sound management of chemicals and hazardous materials in accordance with agreed international frameworks;
e) reduce the average material intensity of consumption per capita in developed countries by xx% in 2030;
f) enhance international cooperation in implementing sustainable consumption and production patterns, including through financial resources, capacity-building and technology transfer to developing countries.

Focus area 12. Climate change

Take urgent and significant action to mitigate and adapt to climate change

Build a climate change goal based on the outcome of COP21 of the UNFCCC

a) hold the increase in global average temperature below an x°C rise in accordance with international agreements;
b) build resilience and adaptive capacity to climate induced hazards in all vulnerable countries\textsuperscript{109}

c) integrate climate adaptation and emissions reductions into development plans and poverty reduction strategies\textsuperscript{110}

d) introduce instruments and incentives for investments in low carbon solutions in infrastructure, industry and other sectors\textsuperscript{111}

e) improve education and awareness raising on climate change

Appropriate means of implementation

Focus area 13. Conservation and sustainable use of marine resources, the oceans and seas and their resources

Take urgent and significant actions for the conservation and sustainable use of marine resources, the oceans and seas and their resources

a) by 2030, prevent, control and reduce by x% marine pollution and marine disposal of waste and tailings, including from land-based activities\textsuperscript{112}

b) by 2030, restore and protect marine ecosystems from destruction\textsuperscript{113}, including by halting and preventing ocean acidification\textsuperscript{114}

c) by 2030, regulate harvesting to restore fish stocks to ecologically safe levels that can produce maximum sustainable yield\textsuperscript{115}, and support sustainable small-scale fisheries\textsuperscript{116}

d) develop and ensure the full implementation of existing regional and international regimes governing oceans and seas, including for resources in areas beyond national jurisdictions\textsuperscript{117}

e) by 2020, eliminate reduce substantially the illegal, unreported and unregulated (IUU) fishing\textsuperscript{118} and destructive fishing practices\textsuperscript{119}

f) establish Marine Protected Areas, consistent with international law\textsuperscript{120}

g) by 2030, eliminate fishing subsidies which contribute to overcapacity and overfishing\textsuperscript{121}

Appropriate means of implementation

Focus area 14. Ecosystems and biodiversity

Protect and restore terrestrial ecosystems and halt all biodiversity loss

a) by 2020 halt control the loss of all biodiversity, including habitats, and protect threatened species\textsuperscript{122}

b) by 2020 ensure conservation and sustainable use of ecosystems, including through restoration of degraded critical ecosystems\textsuperscript{123}

c) maintain genetic diversity of both farmed species and their wild relatives\textsuperscript{124}
d) by 2030, ensuring the implementation of sustainable forest management of all types of forests and mountain ecosystems, halting deforestation and increasing forest cover recovery and reforestation, as well as restoring degraded forest ecosystems and increasing protected forests area by x% by 2030.

e) by 2030, achieve a land degradation neutral world.

f) ensuring fair and equitable sharing of benefits derived from the utilization of natural assets, including genetic resources.

g) end poaching and trafficking of protect endangered species according to the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES);

h) by 2030, eliminate invasive alien species.

i) ensure inclusion of indigenous and local communities in decision making, and promote traditional knowledge of indigenous peoples.

j) provide adequate incentives and policy space for developing countries to advance sustainable forests management and enhancement of forest carbon stocks;

k) by 2020 achieve the comprehensive protection of wetland ecosystem.

Appropriate means of implementation

a) ensuring support for developing countries, including countries in special situations, in enhancing their capacities and ensure affordable access to related know-how, science, technologies, and innovations by developing countries, including countries in special situations.

b) enhance access to science, engineering and technical skills, and innovations for developing countries, including countries in special situations.

Focus area 15. Means of implementation/Global partnership for sustainable development

Strengthen global partnership for sustainable development

Means of implementation

Trade:

a) promote open, rules-based, non-discriminatory and equitable multilateral trading and financial systems, including complying with the agricultural mandate of the WTO Doha Round.

b) provide greater duty-free and quota-free market access to least developed countries in keeping with World Trade Organization decisions.

c) improve market access for agricultural and industrial exports of developing countries, especially Least Developed Countries, and at least double the share of LDCs’ exports in global exports by 2020.

Comment [NR8]: Reinventing the wheel, as the outcomes of the WTO Ministerial Meeting 2013.
Technology transfer, technological capabilities:

d) enhance regional and international cooperation for science, technology, and innovation and solutions-oriented research, and enhance knowledge sharing, including through North-South, South-South and triangular cooperation.

e) promote transfer and dissemination of clean and environmentally sound technologies to developing countries, make a list of priorities in transferring technology and develop specific work and implementation plans by 2020.

f) fully operationalize the Technology Bank and STI Capacity Building Mechanism for developing countries, including countries in special situations, and LDCs.

g) strengthen institutions and build capacities in developing countries to undertake research, development and adaptation of technologies, including clean and environmentally sound technologies.

h) support fully research and development of vaccines and medicines for the common diseases of developing countries, notably LDCs.

Financing and debt sustainability:

i) full implementation by developed countries of ODA commitments on an agreed timetable based on agreed principles, according to Monterrey Consensus.

j) mobilize additional financial resources from multiple sources, including reducing the cost of remittances.

k) encourage long-term private foreign investment and inclusive finance.

l) ensure adequate financial resources for investments in sustainable development.

m) ensure debt sustainability, debt restructuring and debt relief while taking into account each country’s needs to successfully implement the agreed SDGs.

r) Improve financial regulation system, strengthening regulation of cross border capital flow and commodities price volatility.

Capacity building:

q) expand by x% globally the number of scholarships for students from LDCs to enroll in higher education programmes in developed countries and other developing countries, with focus on science, engineering and management.

r) substantially strengthen capacities for sustainable development data collection and analysis with a focus on generating disaggregated, timely and high-quality data.
s) countries progressively introduce expanded measures of progress beyond GDP into national accounting, with strengthened supportive statistical capacity building in national accounting for developing countries including countries in special situations.

t) develop and implement capacity building programmes in developing countries, especially LDCs, in support of the national plans implementing sustainable development goals, including in agriculture, water, energy, health as well as in disaster prevention and reduction capacity and sustainable natural resources management.

u) Enhance human resources development and institutional capacity building through training, experience sharing, knowledge transfer and technical assistance.

**Strengthened Scale up global partnership for sustainable development**

**Note:**
*Global partnership should be based on MDGs in accordance of common but differentiated responsibilities for common prosperity and development of all countries. North-South cooperation remains the core of the partnership and South-South cooperation and triangular cooperation are useful supplement to North-South cooperation. Developed countries should scale up their support especially ODA for developing countries, especially countries in special situations.*

u) Global partnership for development should be guided by intergovernmental cooperation. Private sector, philanthropic organizations, NGOs and other stakeholders should be complementary partnerships not a substitute. Engage all stakeholders in implementation of the SDGs, including through effective, innovative and accountable partnerships in cooperation with governments that mobilize financial resources, develop and disseminate technologies and provide technical expertise.

v) Regular monitoring and reporting of progress on SDGs within a shared accountability framework, including means of implementation, the global partnership among Member States and multi-stakeholder initiatives and partnerships.

**Proposed additional targets:**

a) ODA commitments, recommitment by developed countries to meet the ODA targets with an agreed timetable, and ensure the provision of adequate financial resources for sustainable development of developing countries, including countries in special situations to enable them to achieve the SDGs.

b) ensuring that trade and trade rules work to support the development of developing countries, including countries in special situations to support them in achieving their development objectives.
c) ensuring developing countries, including countries in special situations, achieve debt sustainability through debt financing, debt relief and debt restructuring

d) reducing transaction cost of remittances

e) implement measures to promote, facilitate and finance access to and the development, transfer and diffusion of environmentally sound technologies and know-how to developing countries including countries in special situations, through the UN Global Technology Facilitation Mechanism

f) reform of the international intellectual property regime with a view to facilitating technological catch-up and improving development sectors such as health and education standards, agriculture, food security and enhancing nutrition in developing countries, including countries in special situations; and increase and support for developing countries for using of TRIPS flexibilities

g) improve democratic economic governance, including through the full and effective participation of all countries, in particular developing countries, in global decision making, through among others, broadening and strengthening the participation of developing countries in international economic decision-making and norm-setting, reform of governance of those institutions to be able to deliver more effective, credible, accountable and legitimate institutions

Focus area 16. Peaceful and inclusive societies, rule of law and capable institutions
