

Call for Submissions: Posters from National Research Laboratories

The second annual Multi-stakeholder Forum on Science, Technology and Innovation for the Sustainable Development Goals (SDGs) has put out a call to all Member States, inviting them to submit digital posters featuring the work of National Research Laboratories as they pertain to the SDGs under review this year. This will provide an opportunity to share innovations with Member States and other stakeholders around the STI Forum.

Submission guidelines

- Submissions should relate to an innovation developed in the national research laboratory with the proven potential to make a significant advance in at least one of the SDGs noted above.
- All submissions should include a brief descriptive note (200-300 words), explaining the nature of the innovation, the problem it addresses and how the solution works. The note should also include an assessment of its economic, social and environmental impacts as applicable.
- The name of the submitting institution as well as contact details for further information should be included in the poster.
- Posters should be created electronically in JPG format at 300 resolution, with 0.25” crop marks
- All submissions are to be in English and may be edited for content and formatting.
- If the file size does NOT exceed 10Mb, electronic submissions should be sent by email to vaturi@un.org. Otherwise, please use Dropbox, Google drive, or a similar service, as our servers will not accept emails greater than 10Mb in size.

Submissions are being received by UNDESA on a rolling basis, and will be featured on our website. Posters before 1 May 2017 are being exhibited at the Forum.
