What does it mean for planning?

- Need for a coordination body across ministries
 - a process to foster joint planning
- Need for strong scientific support to understand trade-offs and synergies
- Need for

What does it mean for policies?

- Policies need to be designed in a way such that they are mutually reinforcing ...
- E.g., energy policies and climate policies, agricultural policies and energy policies, both and environmental policies
- Policy analysis needs to account for the 3 dimensions of SD – the social, economic and environmental -- systematically
