

Intervention Lebanon
Mr. Hassan Abbas

Thank you for giving me the floor.

We align ourselves with the statement of the G77 and China and that of the Arab Group on the issue of the MOI's and revised targets.

Concerning the X's and Y's, we support substituting them as suggested by the G77 and China.

In addition, we strongly support the revision to target 1.5 addressing the issue of assistance to those affected by complex humanitarian emergencies. We believe that this revision strengthens the target and contributes to our goal at leaving no one behind. We are aware that some delegations have concerns with regard to the use of the word "complex". Hence, and for the sake of simplicity and consensus, we can be flexible with removing the word "complex" and retaining the expression "humanitarian emergencies" in the revised target.

Thank you
