

**Statement by the Republic of Maldives on behalf of the Alliance of Small Island States
Seventh Session of the Intergovernmental Negotiations on the Post 2015 Development
Agenda**

30 July 2015

New Draft

Co-facilitators,

1. I am delivering comments this evening on behalf of the Alliance of Small Island States (AOSIS). We align ourselves with the statement delivered by the South Africa, on behalf of the Group of 77 and China.
2. First, let me thank you Co-facilitators and your team for the very hard work you have committed to considering all of the varying opinions and needs from different member states. We look forward to seeing this document move forward to final approval.
3. With the options you made available, AOSIS is still not married to the idea of having a preamble; if it is a necessity to include, our preference is for the 2nd , shorter option. However, before we could consider its inclusion, we would need to see deleted the first sentence reading “We the heads of government” as this is a preamble, not a declaration. The paragraph can begin “This agenda.”
4. We also request to add a very short reference to climate change to the preamble, and we suggest language citing the role that climate change can play in undermining sustainable development to the “planet” paragraph. We suggest the following language for this proposal

“We are determined to protect the planet from degradation, **sustainably** managing its natural resources, **and take urgent action to combat climate change**, so that it can...”

5. In paragraph 7 of the Declaration we ask to delete “progressively” after “drinking water” so that the end of the sentence reads “drinking water is realized...”
6. In paragraph 25 we recommend deleting the phrase that begins “[welcoming the Rome Declaration...](#)” and replacing it with more inclusive reference that reads “and in this regard, reaffirm the important role and inclusive nature of this Committee on World Food Security”. We also request to add a reference to the sustainability of fisheries at the end of the paragraph so that the language reads: “sustainable agriculture and sustainable fisheries and supporting ...” at the end of the paragraph, we believe it would better to give a general reference “to all developing countries”.
7. The climate change paragraph 31 is clearly an issue of great concern for SIDS as recognized by member states in the UN Security Council session today. Regarding the options made available in this draft, we would prefer to work on the basis of paragraph 31 and reject 31 alt.
8. Moving on to the Goals and Targets, we appreciate the inclusion of the reference to baseline data, as well as how you addressed the concerns regarding the Xs. We could live with 14c, although we would have liked the first alternative. AOSIS can also go along with the changes in 3.2 and 8.7. On 17.2, we would like to note that developing countries has now been dropped, and request that this be amended.
9. If you recall, on the targets to add LLDCs, we asked that since these targets were open to tweaking now, that as LLDCs were being added to address commitments made under the VPoA, we add SIDS to those targets that speak to commitments made under the SMAOA Pathway, which are 1a, 9c, and 13b.
10. In conclusion, we thank you again for your many hours dedicated to this text – it has certainly become a part of our lives and we look forward to moving forward with these few small edits and seeing in September our heads of state move it into action.

I thank you
