

Australia

Australia would like to make two quick factual comments on the summary.

Paragraph 46: This paragraph seems to draw a number of different points that were combined into a single paragraph which may not accurately reflect the intent ? it should be reviewed by the Co-Chairs. Our recollection was that this proposal was made by a single country.

Paragraph 49: This paragraph should more accurately reflect the extent of support for the proposal. It was proposed by a single country and supported by several.

Australia would also support the suggestion of Guatemala about the insertion of a chapeau paragraph indicating that this document is a summary document and does not reflect a consensus.
