

Intervention by Head of Cambodia's Delegation
Dr. Chhun Vannak, Senior Minister's Advisor and Deputy Director General for Inspection
2nd Preparatory Committee Meeting UN Conference on Sustainable Development (UNCSD)
Session 2
Green Economy Theme
15:00-18:00 PM
New York, 7 March 2011

Thank you, Mr. Chair. We associate ourselves with the statement by Nepal on behalf of the Less Developed countries (LDCs) this morning and the statement by Argentina on behalf of the G-77 and China on green economy. We will submit the answers to the seven questions this morning.

Now my delegation would like to turn to a green economy theme regarding the seven questions by identifying certain elements for the green economy theme in the context of sustainable development and poverty reduction as follow:

1. Integrating green growth actions into development planning and natural resource management with a strong support of policy and law on green growth initiatives and low carbon bound initiatives; Senior Minister of Environment is implementing the project of REDD-Plus (Reduced Emission from Degradation and Deforestation) by national strategies and efforts to preserve forestry in the country and the protected areas for **access to carbon credit market**. The Senior Minister and the government have developed **national green growth road map**
2. Broadening market access of the DVCs and LDCs on green products.
3. Building up green industrialization through large investments in environmentally friendly products for the implementation of the green economy
4. Ensuring equitable trade among North-South, South-South cooperation and coordination to well address issues of transition to green economy.
5. Promotion of Green education to raise capacity building for the Developing countries and Less Developed countries.
6. Establishing green economy governance by enhancing corporate social and environmental responsibility (CSER) and mainstreaming (10 YFP on SCP) the 10 Year Framework Programme on Sustainable Consumption and Production into the green economy processing

7. Increasing financial and economic cooperation in an integrated approach and holistic approach in order for the DVCs and LDCs to well absorb green economy beneficial to better management of natural resources, raising economic growth and the eradication of poverty and at last achieving the MDGs goals.

8. Enhancing agricultural productivity from green economy policy and principles

9. Promoting synergies of thematic clusters of the CSD-18 and 19 for greening the economy.

We greatly thank **Mr. Chair** for stimulating the interactive discussions on green economy.
