

Higher Education Sustainability Initiative Global Event

11 July 2018, UNHQ, New York

The Higher Education Sustainability Initiative (HESI), a partnership between United Nations Department of Economic and Social Affairs, UNESCO, United Nations Environment, UN Global Compact's Principles for Responsible Management Education (PRME) initiative, United Nations University (UNU), UN-HABITAT, UNCTAD, and UNITAR), was created in 2012 in the run-up to the United Nations Conference on Sustainable Development (Rio+20). With commitments from over 300 universities from around the world, HESI accounted for more than one-third of all the voluntary commitments that were launched at Rio+20. Through its strong association with the United Nations, HESI provides higher education institutions with a unique interface between higher education, science, and policy making.

On the occasion of the 2018 session of the High-Level Political Forum on Sustainable Development – the United Nations' central platform for follow-up and review of the 2030 Agenda for Sustainable Development and the Sustainable Development Goals (SDGs) - the partners of HESI are organizing an event for higher education institutions to showcase how the 2030 Agenda for Sustainable Development, including the SDGs, is being integrated into sustainability strategies, research, teaching, pedagogy, and campus practices, and to position higher education institutions as key drivers for achieving the SDGs.

Participants of the HESI event will include government officials, academia, university administrators, UN representatives, sustainability professionals, major groups and other relevant stakeholders.

The event is open to all HLPF participants (UN grounds pass required, or special event ticket).

How are you integrating SDGs into your teaching, research, outreach and practice?

HESI provides a unique interface for higher education institutions to share their experiences and strategies for advancing the sustainable development agenda:

- 1) Teach sustainable development across all disciplines of study, including through online based platforms,
- 2) Encourage research and dissemination of sustainable development knowledge,
- 3) Green campuses and support local sustainability efforts,
- 4) Engage and share information with international networks,
- 5) Engage universities in local government and city development projects.

- Ms. Maria Cortes-Puch, Head, National and Regional Networks, Sustainable Development Solutions Network

Followed by interactive dialogue

Guiding questions

1. What are some of the best practices and good examples your institution has done to mainstream the SDGs into curricula, programmes and research? How can it be done through the Higher Education Ordinance or Exam Ordinance?
2. How is students' SDG knowledge and engagement obtained through connecting learning outcomes, learning activities and assessments (in accordance with the principle of constructive alignment)?
3. How can research be used to contribute to SDG implementation? In what ways have you used research outcomes to inform and raise awareness of the public in your country about the SDGs?
