2030 National Strategy for Sustainable Development of Montenegro
Voluntary National Reviews at the HLPF in 2016

Jelena Knezevic
Department for Sustainable Development
MSDT
19 July 2016
VOLUNTARY NATIONAL REVIEWS AT THE HLPF 2016

MONTENEGRO
- Policy and legislative framework
- EFP and biocapacity
- DMC/RP
- LC
- Integrated system of SD indicators

2007 NSSD
- Annual Reports
- Annual MDGs report

RIO + 20
- Platform for participation of Montenegro at Rio + 20
- 20 years of ecological state of Montenegro
- The Future I want

Post 2015 process
- The Process „The Montenegro I want“
- National positions at OWG
- Agenda 2030

EU integration process of MONTENEGRO
- EU 2020
- EU Resource Efficiency Road Map
- The priorities in the process of EU integrations

Med Strategy for SD
- SCP Regional Action Plan
- Regional Framework for Adaptation to Climate Change

2013 - Baseline, Platform
2014 - First Draft NSSD
2015 - NSSD Action Plan
2015 - Draft NSSD with AP
2016 - Adopted 2030 NSSD

Expert baseline analyse

Mediterranean processes

Draft NSSD Action Plan

Draft NSSD with AP

Adopted 2030 NSSD

NSSD `s Content

1. Role and importance of NSSD until 2030
2. The assessment of national resources
   - Human, Social, Natural and Economic
   - Governance for SD
3. Key unsustainable development trends and sustainable development needs in period until 2030
4. Strategic goals and measures
   - Improving the status of human resources and strengthening of the social cohesion
   - Support to values, norms and behavior patterns of importance for the sustainability of Montenegrin society
   - Protection of natural capital
   - Introducing green economy
   - Improving of the Governance for SD
5. Financing for SD
6. NSSD Action plan until 2030
7. Monitoring of NSSD implementation and measuring the sustainability of national development until 2030
2030 Agenda:
- 17 goals
- 169 targets
- 241 indicators
- AAAA as financial framework

2030 NSSD undertakes following elements of Agenda 2030

All 17 SDGs
167 targets OUT OF 169

241 indicators 41,1% until 2018

AAAA
## Overview of the integrated goals and targets of the 2030 Agenda per NSSD priority areas

5.1 STRENGTHEN GOVERNANCE SYSTEM FOR SUSTAINABLE DEVELOPMENT

5.2 STRENGTHEN THE ENVIRONMENTAL MANAGEMENT BY IMPROVING USE OF ENVIRONMENTAL PROTECTION INSTRUMENTS

5.3 REFORM GOVERNANCE SYSTEM FOR SUSTAINABLE DEVELOPMENT

5.4 ESTABLISH THE SYSTEM FOR MONITORING THE SUSTAINABILITY OF NATIONAL DEVELOPMENT - TRANSITION FROM MDGS TO SDGS

5.5 ESTABLISH THE LONG-TERM SUSTAINABILITY OF THE FINANCING FOR SUSTAINABLE DEVELOPMENT

HIGHLIGHTS FOR GOVERNANCE FOR SD

- Reform of the National Council for SD
- OPTIMAL SCENARIO: Unit with responsibilities for implementation of sustainable development policy in the PM`s Cabinet
- Capacities in MF, departments, local administrations, Centre for SD
- Financing for SD
Establishing baseline for measuring the progress on SDGs

-Baseline for measuring progress on SDGs and related targets was established by defining measures and sub-measures within NSSD

-The trend to monitor the implementation of sustainable development targets will be established through the monitoring of strategic goals of NSSD 2030 which integrated targets

SDG 1: End poverty in all its forms everywhere

- Measures and sub-measures defined within the framework of the NSSD 2030 strategic goal „Stimulate employability and social inclusion“ create the assumptions for the implementation of the following sustainable development targets: 1.1, 1.2, 1.3, 1.4, 1.5, 1.a and 1.b.

- Measures and sub-measures defined within the framework of the NSSD 2030 strategic goal “Enable symbiosis of the effects of the enhancement of the conditions of the environment and people’s health“ create the assumptions for the implementation of the following sustainable development targets: 1.1 and 1.5.

- Measures and sub-measures defined within the framework of the NSSD 2030 strategic goal „Strengthening resilience, reduction of vulnerability and exposure to natural and anthropogenic hazards“ create the assumptions for the implementation of the target 1.5.
Establishing baseline for measuring the progress on SDGs

- The problems of the sustainability of Montenegrin development as defined in the Chapter 3 of the NSSD and briefly presented under 3.3.4 of the VNR are at the same time key gaps and challenges in the implementation of 17 SDGs and related targets.
- The NSSD 2030 Action Plan defines the responses to the recognized problems and gaps through sustainable measures and sub-measures structured within the framework of the NSSD strategic goals.
- The overview of the NSSD measures that define national responses in the context of achieving NSSD strategic goals and/or 17 SDGs and 167 sustainable development targets in the time horizon until 2030.

SDG 1: End poverty in all its forms everywhere

- Achieve the assumptions for self-sustainable and balanced economic development, which will reduce the rate of economically vulnerable population, SDG 1 (1.3, 1.5)
- Ensure social stability and reduce poverty rate, SDG 1 (1.1, 1.2, 1.3, 1.4, 1.a and 1.b)
- Reduce vulnerability of population to climate change, SDG 1 (1.5)
- Enhance resistance of humans, society and ecosystem to those aspects of climate change that cannot be avoided
- Invest in risk reduction and in enhancing the resistance of natural and social systems, SDG 1 (1.5)
Partnerships for the SDGs

- Stimulate active approach of key stakeholders to sustainability of development

- Reform the institutional organization of the governance system for sustainable development (SDG (16.6, 16.7, 16.8), SDG 17 (17.3, 17.6, 17.7, 17.8, 17.9, 17:13, 17:14, 17:15, 17:16, 17:19), Paragraphs 3, 5, 21, 39-41, 45-48,54-59, 60-91),

  Establish a long-term sustainable system of financing for sustainable development
NSSD’s Instruments

1. Ecological Footprint (EF)
The indicator which is important because of the commitment of Montenegro to conceive its development on the concept of "ecological state"

2. Human Development Index (HDI)
Universal indicator that relocates development from a purely economic category

3. Gender Inequality Index (GII)
Monitors gender (in)equality from the aspect of social development

4. Domestic material consumption (DMC)

5. Resource Productivity (RP)
DMC and RP are the indicators of the circular economy, important for the assessment of the efficiency of resource use in the economy, or the conservation of the available limited natural resources

6. Land Consumption (LC)
The indicator which measures the trend of sustainable consumption of land which is a non-renewable resource particularly exposed to growing anthropogenic pressures due to urbanization
