TURKMENISTAN'S NEXT STEPS IN IMPLEMENTING THE SDGS

We will continue to improve the statistical capacity of the country, develop a national indicator system and create a SDG database, and look forward to fruitful work with UN agencies and international organizations in this area.

A key component in the implementation of the Agenda is the provision of financing for development. Turkmenistan is improving its public finance system, including through fiscal regulation in order to mobilize domestic resources. At the same time, it is important to complement the increase in domestic resources with international assistance. Being committed to solving the problem of financing sustainable development, it is important to promote cooperation with the participation of the UN system, the Bretton Woods institutions and international development banks, and also provide access to concessional and innovative financing for middle-income countries.

Turkmenistan remains consistently committed to building peace-loving societies by protecting human rights and its dignity, disarmament and non-proliferation, promoting global and regional cooperation through the development of a regional interaction framework, and coordination of interaction in addressing global challenges. In order to resolve water and environmental issues in Central Asia, Turkmenistan will continue to work on the development of a UN Special Program for the Aral Sea Basin.
