

Key Findings of the Synthesis Report SDG 6 Water and Sanitation

Stefan Uhlenbrook

UNESCO World Water Assessment Programme (WWAP), Perugia, Italy

Based on the work of a UN-Water Task Force and MANY other contributors

Members of Taskforce include: CEO Water Mandate, FAO, ILO, UNDP, UNECE, UNEP, UNESCO (coordinator), UN-HABITAT, UNICEF, UNU, UN-Water TAU, WHO, WMO and World Bank

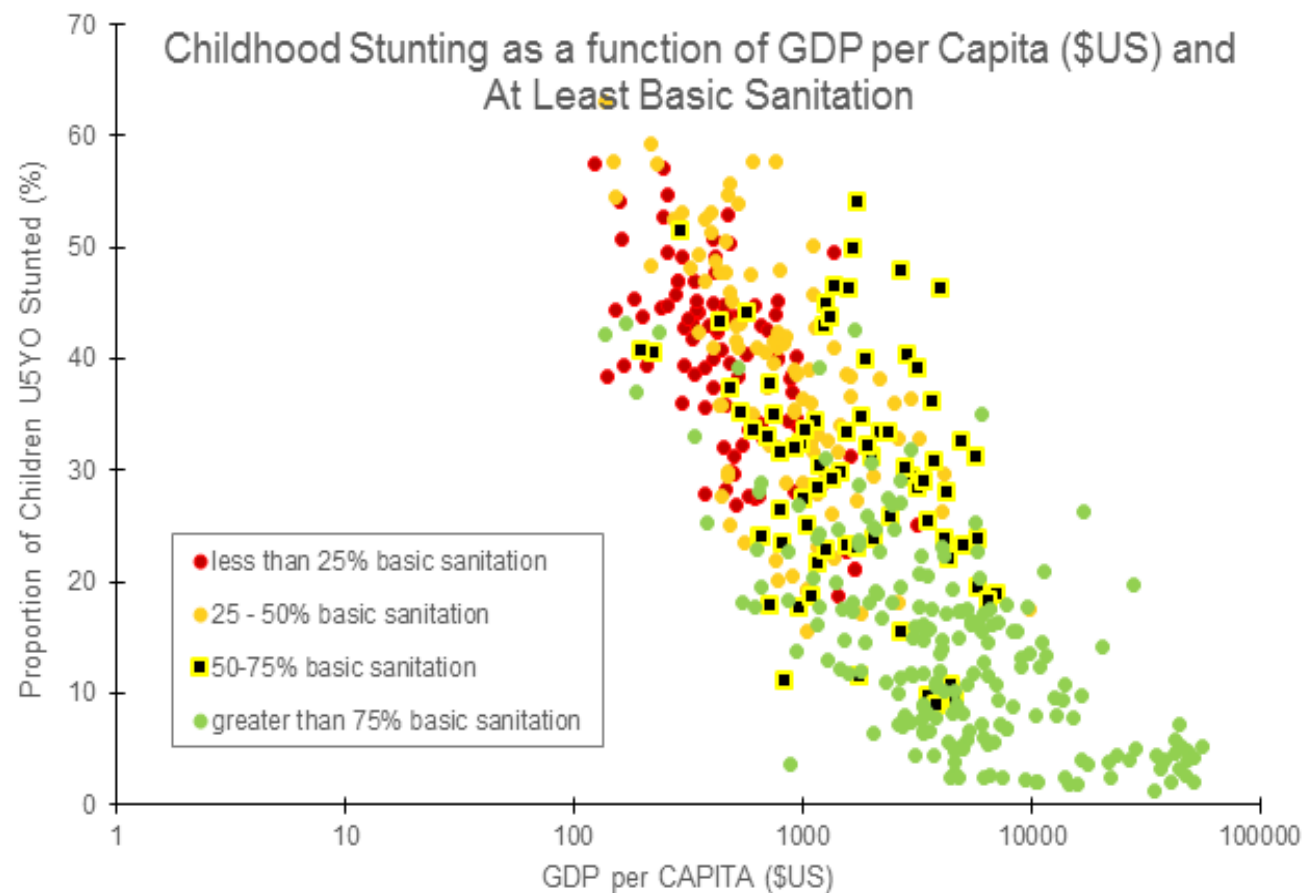

High-level Political Forum for Sustainable Development (HLPF) 2018 – In-depth Assessment of SDG 6

9 July 2018, United Nations Headquarters, New York, USA

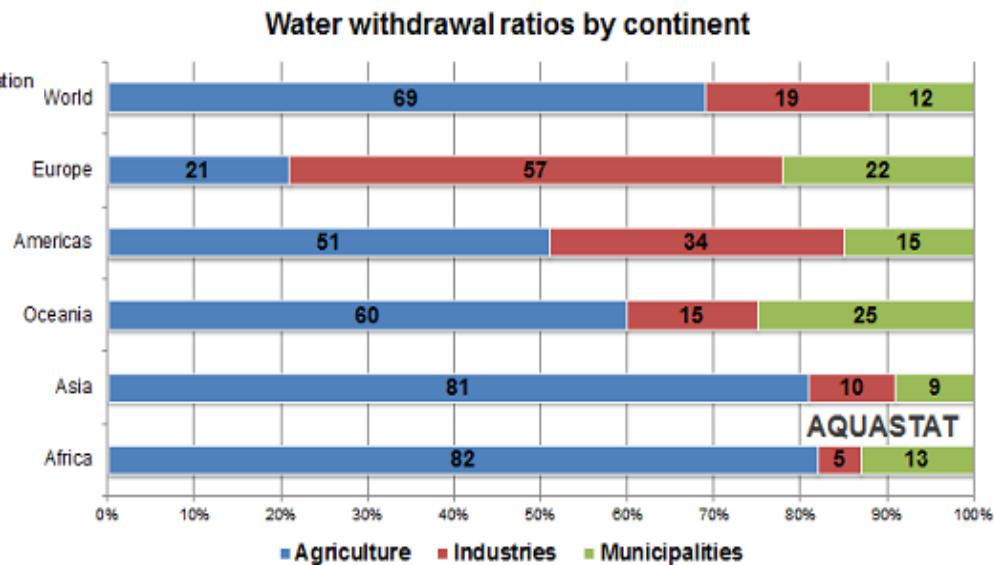

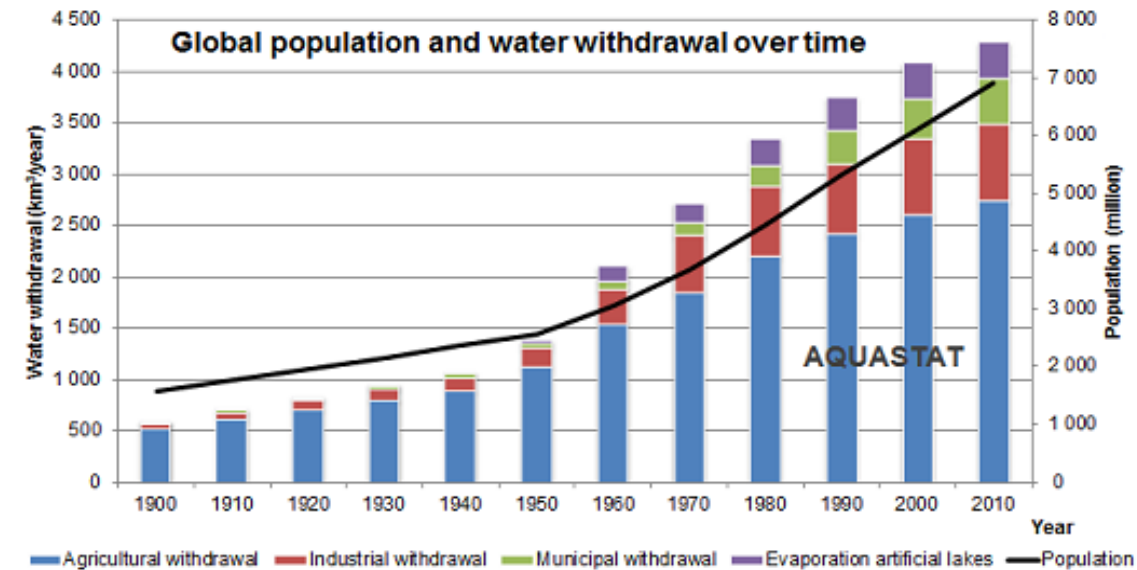

WATER, SANITATION, INCOME and HEALTH

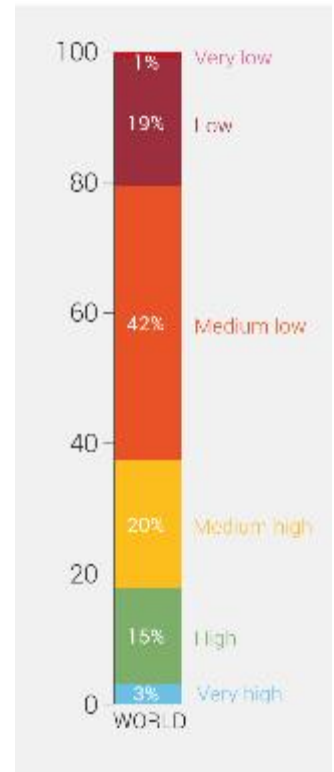

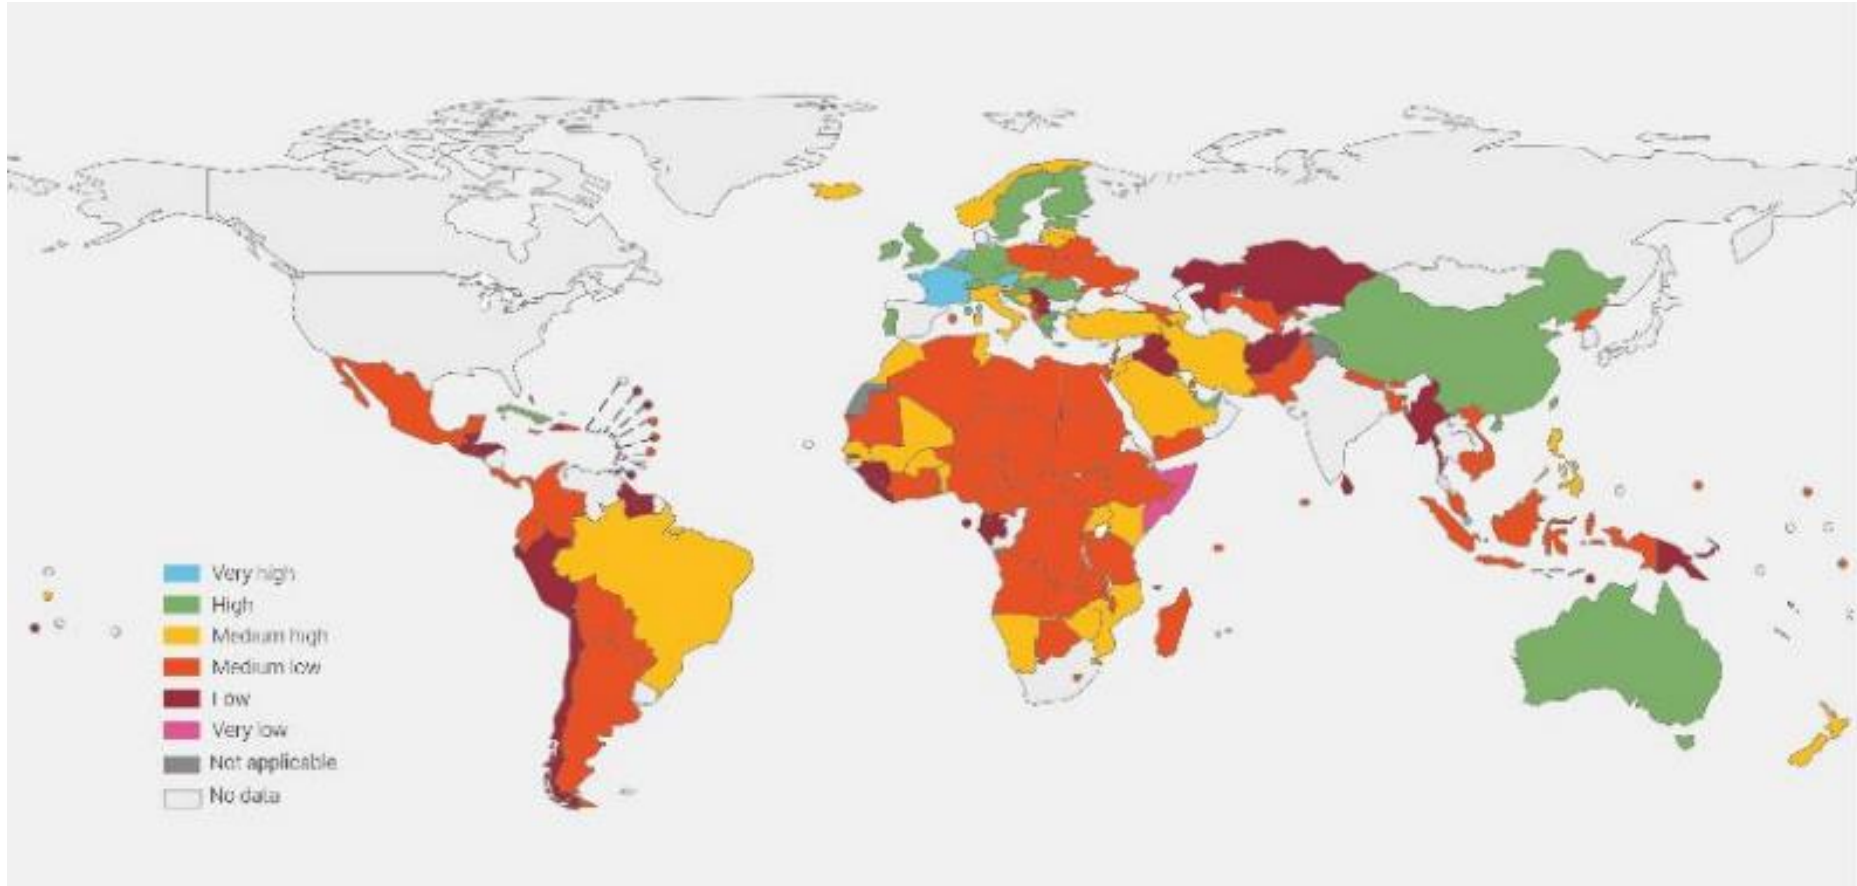

GLOBAL WATER WITHDRAWALS – Water savings required

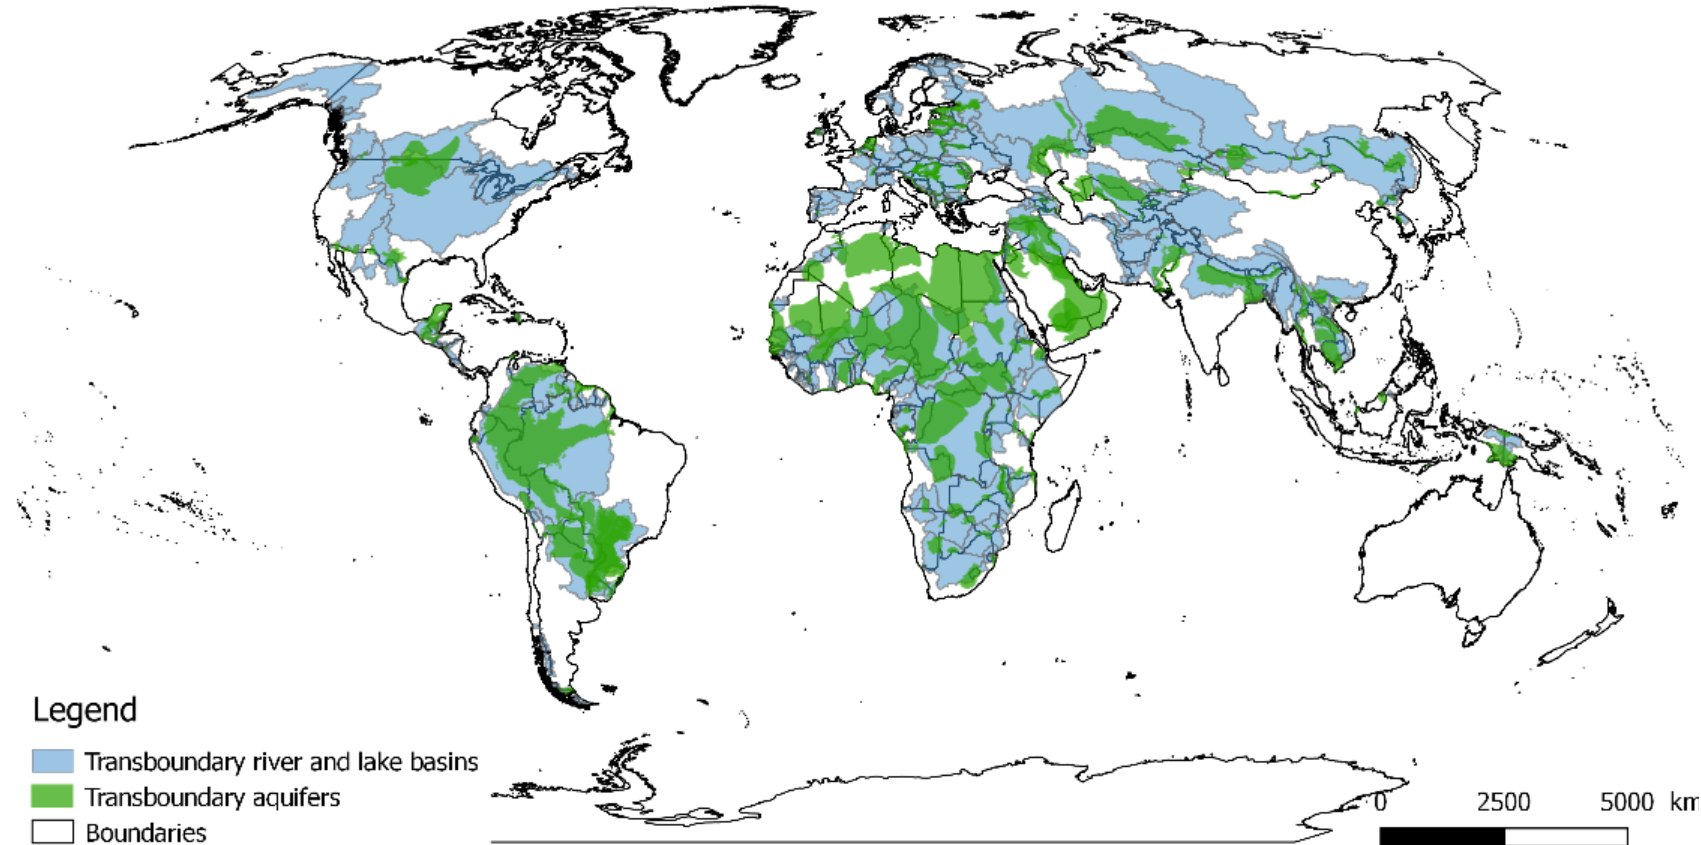

Degree of implementation of IWRM

38% of countries reported at least medium-high IWRM implementation in 2017/18

IWRM implementation in 2017/2018

Proportion of transboundary basin area with an operational arrangement for water cooperation

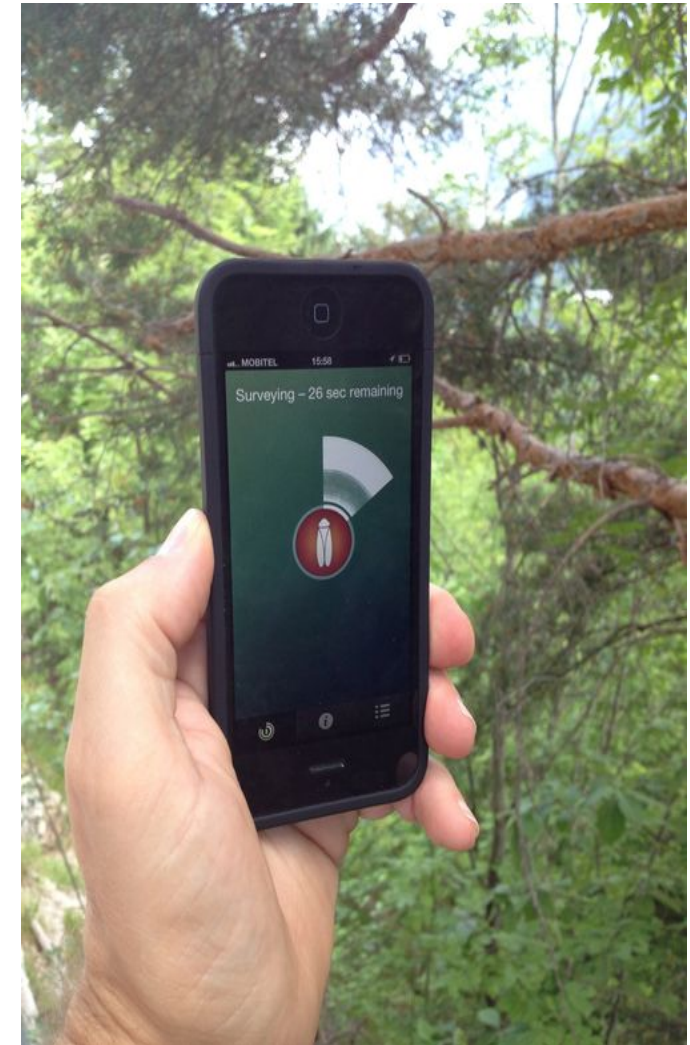

Average of the national percentage of transboundary basins covered by an operational arrangement:
59 % (62 out of 153 countries)

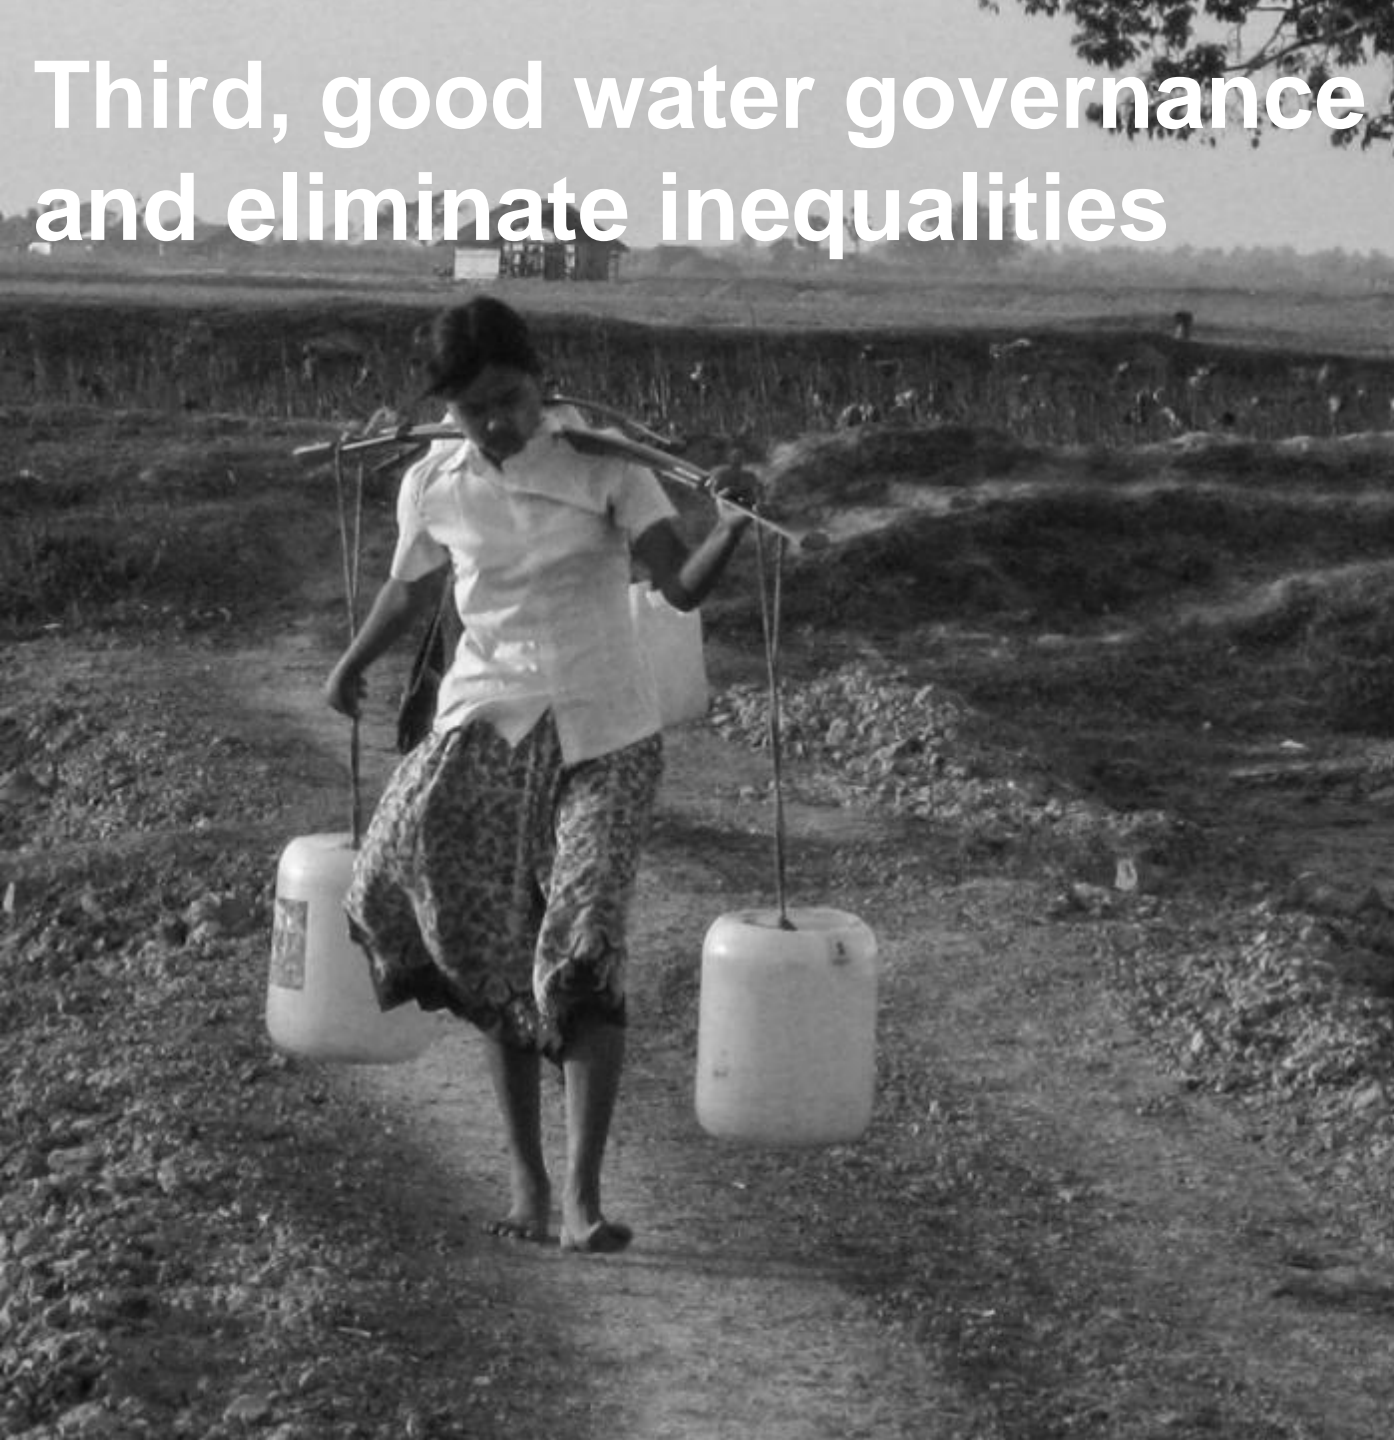

First, Multi- stakeholder partnerships

Second, better monitoring and innovations

Third, good water governance and eliminate inequalities

In most countries, the burden of water collection falls mainly on women

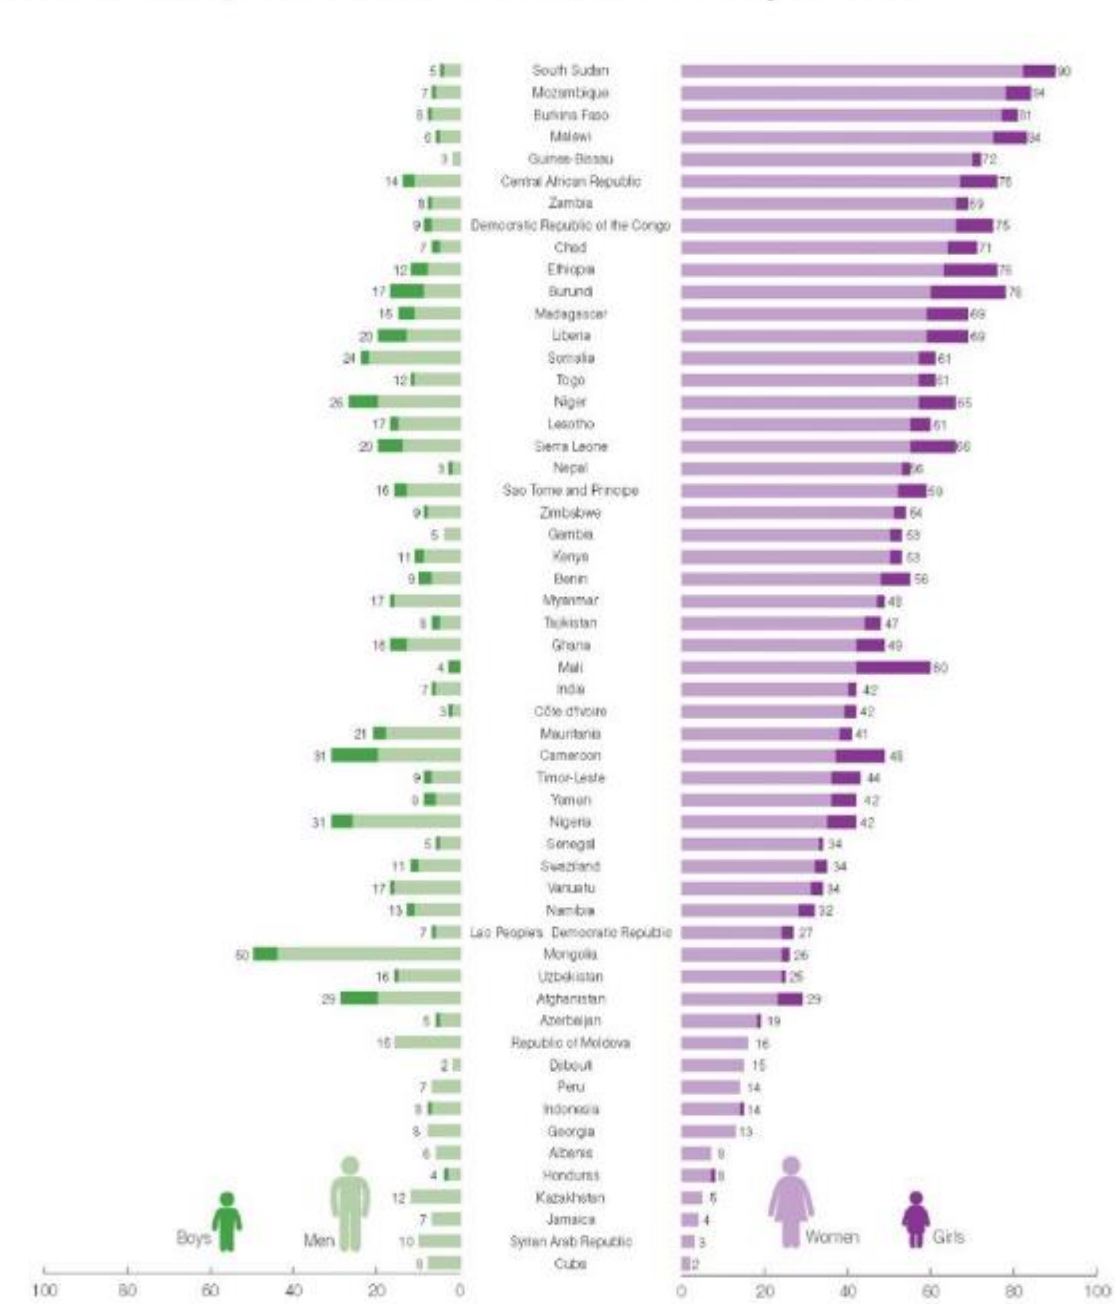

FIGURE 20 Primary responsibility for water collection in rural areas, by gender and age (%)
Data source: WHO 2017
Note: Restricted to countries where at least 1 in 10 households have water off premises

Five, strengthen human and institutional capacity

Thank you!
