Grantee: Alii ma Faipule Savaia Lefaga

Location: Savaia Lefaga

SGP Contribution: 35,094 USD

Cash Co-Financing: 3,831 USD

In-Kind Co-Financing: 40,000 USD

Project Duration: 2005-2008 (Core) & 2008-2012

Background

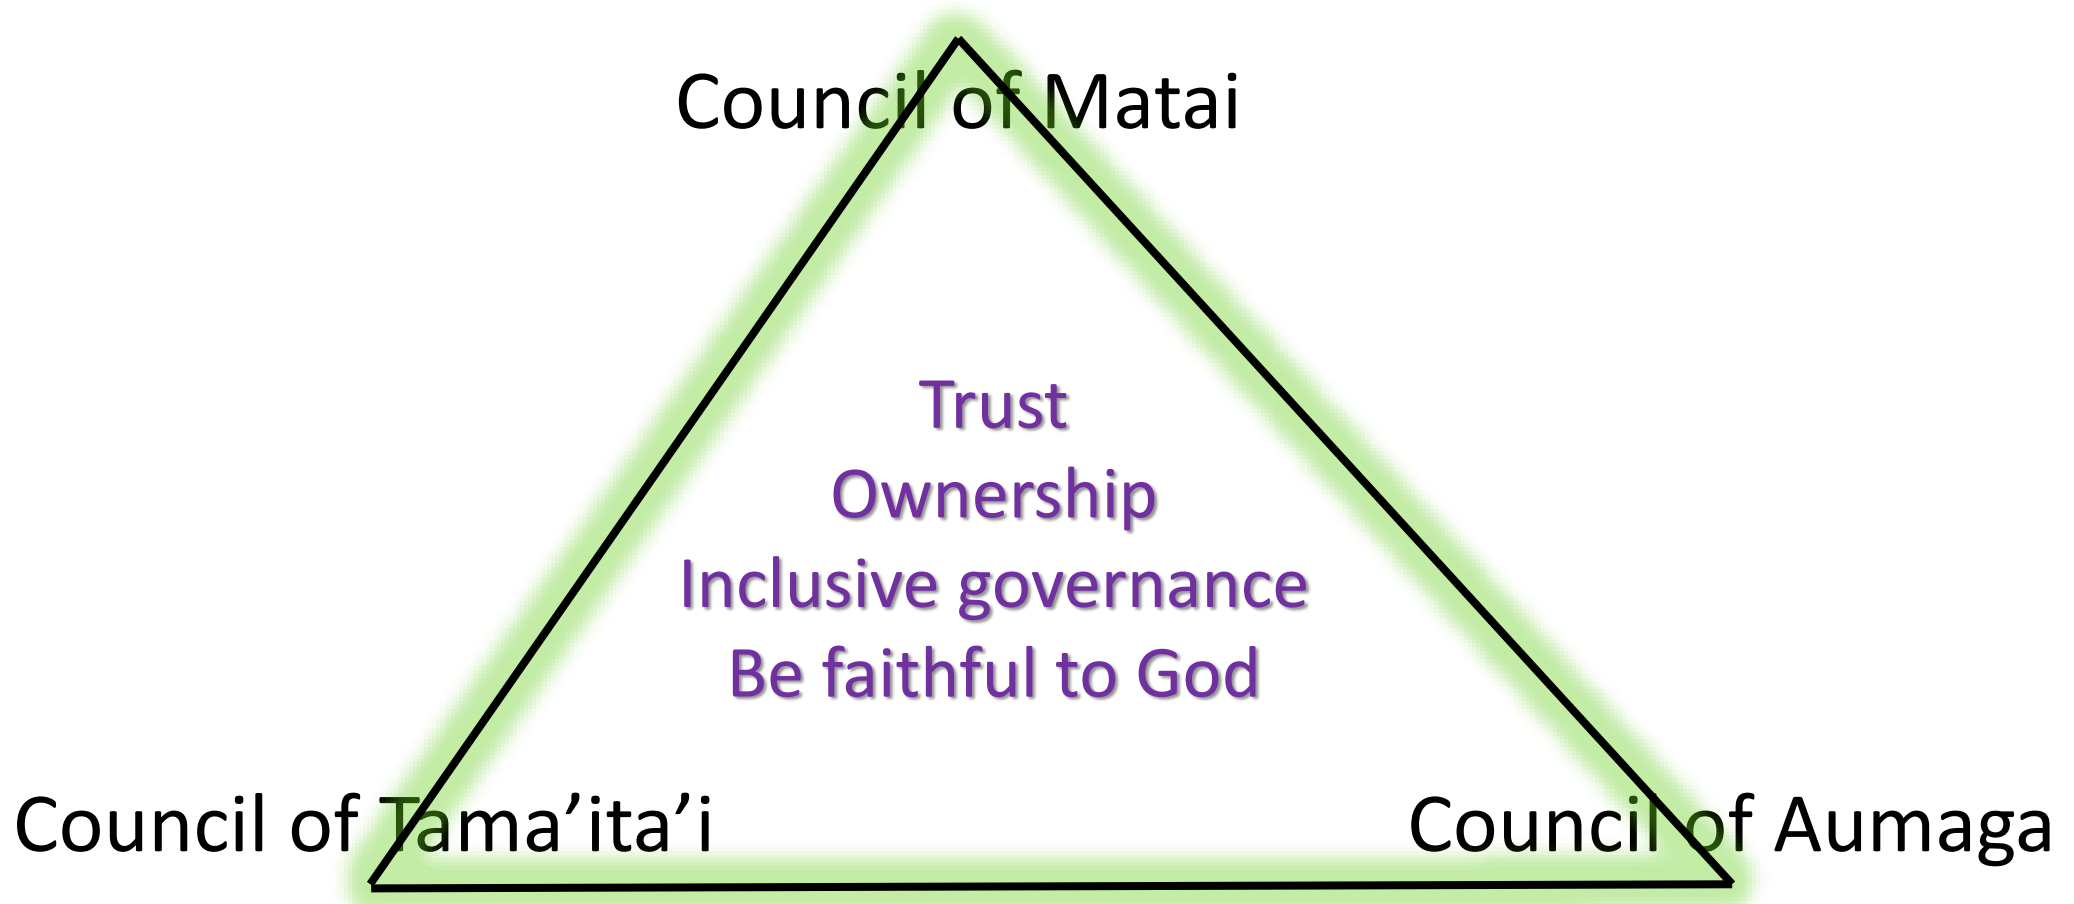

Savaia marine resources were threatened by over-fishing and the harvesting practices (coral crushing and dynamiting) used in the past years. The coastal community was also very prone to high surges and king tides which threatened their coastal beach with sand erosion. Other stressor such as sand extraction and sedimentation from land affected the conservation of the village marine life.

Project Objectives and Key Activities

To improve the coastal and marine environment of the Savaia village from the effects of cyclones, destructive harvesting, over-fishing and land use activities. Using a

How could we build a workable system?

Way forward to ensure no one is left behind???

Live smarter so that Savaians :

- become healthy and know they have families,
- have some form of education to manage what surround them,
- are Samoans in the village of Savaia,
- Look after and warrant the environment is a master of everyone.
