GENDER GAP IN:

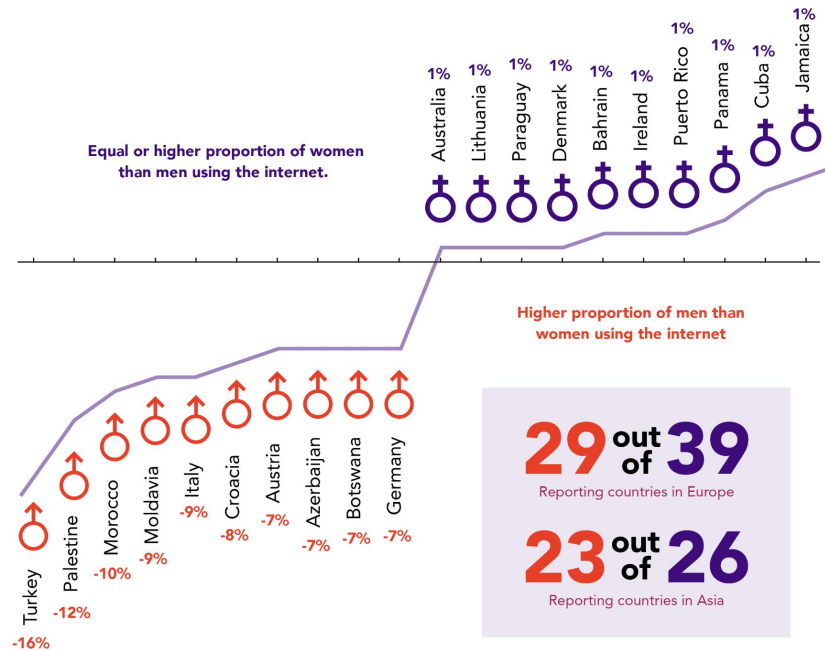

Digital Access

Digital Skills

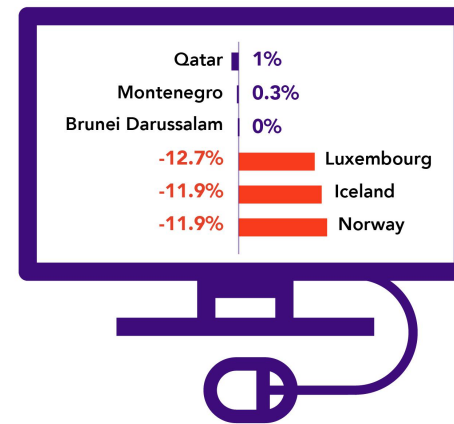

GENDER GAP IN INTERNET USE (Top 10 and bottom 10)

In a majority of reporting countries around the world, men use the internet more than women do.

GENDER GAP IN PROGRAMMING SKILLS AND STEM EDUCATION

Gender gap in programming skills
(Top & Bottom countries)

Only 3 in 10 computer sciences or engineering students are women.

Only 35% of women pursue higher education in STEM subjects. When they do, they study natural sciences more than applied sciences related to ICT.

GENDER GAP IN Digital Leadership

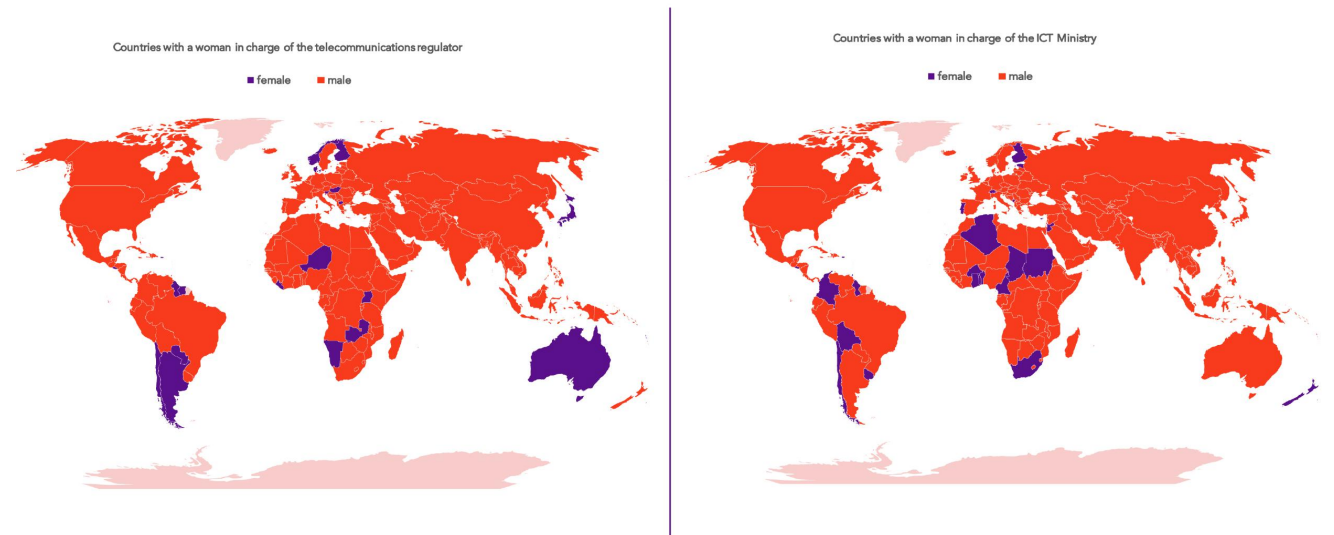

WOMEN IN ICT PROFESSIONS

Women make up very small proportions of ICT professionals; median levels are below 34% for most regions

WOMEN IN ICT POLICYMAKING

Worldwide, only 28 countries (13%) have a woman in charge of an ICT ministry. Similarly, only 26 (13%) countries have a woman heading the telecommunications regulator

BARRIERS TO DIGITAL GENDER EQUALITY

RECOMMENDATIONS

- **Expand infrastructure to unserved/underserved**
- **Improve affordability**
- **Remove gender-based barriers to acquiring business capital**
- **Invest in digital literacy capacity building**
- **Address gender stereotyping of STEM**
- **Invest in entrepreneurship capacity building**
- **Provide relevant content & services**
- **Increase awareness/show relevance of ICTs & ICT careers**
- **Address gender stereotyping of STEM**
- **Develop social, technical, & regulatory measures to eliminate safety/security threats in public, educational & workplace settings**
- **Combat stereotypes, biases & discriminatory norms at individual, institutional & societal levels**
- **Collaborate with stakeholders**
