

Kehkashan Basu
Founder President

- **Huge opportunity exists for Sustainable Transport Solutions in developing countries , in both rural & urban settings.**
- **The process of building back better provides an unique scope for discarding fossil fuel driven transport systems & evolve to clean energy solutions, in keeping with SDG target 9.1**
- **Sustainable transport requires infrastructure and LDCs which are anyway struggling for resources will need the support of the international community that should ideally be in the form of development linked investment.**
- **We must establish circular economy solutions that support local innovations in establishing renewable energy driven transport.**
- **Multi-Lateral cooperation that allows transfer of technology, resources and investment between developed nations and the global south will be the key to build sustainable transport solutions.**
