PROPOSALS FOR CROSS-CUTTING TARGETS: ............................. 160
Focus area 1. Poverty eradication

Eradication of poverty in all its multi-dimensional forms remains the overriding priority and a necessary condition for sustainable development. The pursuit of this is critical to realizing the unfinished business of the MDGs. Some areas that could be considered include:

From Focus Area Document:

a) eradicating absolute poverty;
b) reducing relative poverty;
c) providing social protection and social protection floors as relevant to reduce vulnerabilities of the poor, including children, youth, the unemployed, migrants, persons with disabilities, indigenous peoples, and older persons;
d) access to property and productive assets, including associated rights, finance and markets for all women and men;
e) addressing inequalities at both national and international levels;
f) pursuing sustained and inclusive economic growth;
g) developing and using evidence-based, high quality, timely, disaggregated data and impartial, internationally established methods for evaluating progress; and
h) appropriate means of implementation.

Goals and targets suggested by Member States, Major Groups and Other Stakeholders:

- Reduce to zero by 2030 the proportion of people with income less than 1.25 US dollars a day\(^2\); Eradicating extreme poverty, reduce to zero the number of people living on less than $1.25 a day\(^3\); Eradication of extreme poverty defined as 1.25 USD/day by 2030\(^4\); Eliminate absolute poverty by 2030\(^5\); Eradication of extreme poverty by 2030\(^6\); Eliminate by 2030,

• Increase investments in rural infrastructure, including roads, storage, and processing facilities.

• Achieve rapid, sustained and inclusive economic growth at least at 10 per cent per annum for least developed countries.

• Incorporate culture and partnerships with cultural agents to achieve poverty eradication and inclusive economic growth. Promote the development of creative and cultural industries through patterns of sustainable production and consumption in the areas of sustainable tourism, preservation of archaeological heritage, urban and architectural planning.

MOI

• Enhanced ODA with long-term predictability and as a direct budgetary support on a sustained basis; Access to nutritious food at a sufficient level is essential; Ensuring employment for the poor, access to finance and productive capacity building.

• A renewed and strengthened global partnership for development in the context of sustainable development, which builds on the strengths of the current global partnership for development, while going beyond and addressing the weakness of its present framework, would be
a positive step to properly address and effectively eradicate poverty\textsuperscript{78}

- Undertake an ambitious and expeditious reform of the International Financial Institutions, particularly in their governance structures, based on full and fair representation of developing countries\textsuperscript{79}

- Debt relief, including debt cancellation and debt structuring must be included\textsuperscript{80}

- Multilateral, regional and sub-regional development banks and development funds should continue to play a vital role in serving the development needs of developing, including through coordinated action to add flexible financial support to national and regional development efforts, thus enhancing their ownership and overall efficiency.\textsuperscript{81}

- Necessity for developed countries to honour their Overseas Development Assistance (ODA) goals and targets of disbursing the equivalent of 0.7 per cent of their GNI to help developing countries with the access of related technology and capacity building, so as to ensure the adequate means of implementation for the developing countries to implement poverty eradication policies and programs with a clear timetable\textsuperscript{82}

- Necessity of timely conclusion for the Doha Round of multilateral trade negotiations, which must fully respect its development mandate and take into account the needs and priorities of developing countries\textsuperscript{83}

- Need for Effective regulation and supervision of financial markets and capital flows\textsuperscript{84}

Focus area 2. Sustainable agriculture, food security and nutrition

Increasing the productivity of agriculture sustainably and improving food systems are important for economic well-being as well as for ensuring food security and nutrition, realization of the right to adequate food and eradication of hunger. Some areas that could be considered include:

From Focus Area Document:

a) ensuring year-round access by all to affordable, adequate, safe and nutritious food;
b) ending child malnutrition and stunting;
c) increasing agricultural productivity, including through adequate irrigation, seeds and fertilisers, while in parallel halting and reversing land degradation, drought and desertification;
d) improving efficiency of water use in agriculture;
e) eliminating use of toxic chemicals;
f) enhancing all forms of agricultural biodiversity;
g) promoting indigenous and sustainable farming and fishing practices;
h) strengthening resilience of farming systems and food supplies to climate change;
i) enhancing adherence to internationally recognized guidelines on the responsible governance of tenure of land, fisheries and forests, including full consultation with local communities;
j) improved access to credit and other financial services, land tenure, and agricultural extension services, for all, including smallholders, women, indigenous peoples and local communities;
k) increased investment and support to research and development on sustainable agricultural technologies;
l) reducing post-harvest crop losses and food waste along food supply chains;
m) addressing harmful agricultural subsidies;
n) addressing price volatility, including through market information and oversight on commodity markets; and
o) appropriate means of implementation.

Goals and targets suggested by Member States, Major Groups and Other Stakeholders:

85 To be determined in the context of Focus area 18.
• Eradicate famine and protect the right to access safe, healthy and sufficient nutrition whilst respecting eating and inter-cultural habits; Sufficient nutritious food for everyone to ensure healthy lives for everyone, especially focusing on children; End hunger and ensure universal access to sufficient, safe, affordable and nutritious food; Eradicate hunger and ensuring year-round access by all to affordable, adequate, safe and nutritious food.

• Reduce chronic malnutrition and infant mortality; Reduce stunting, wasting and anemia for all children under five, and maternal undernutrition; By 2030, eliminating chronically malnourished people; Ending hunger and promoting access to sufficient, safe, affordable, and nutritious food; Reducing child malnutrition, stunting and anaemia – which we are pleased to see referenced in the Focus Areas document, and which are vital to children’s ability to learn, grow, and thrive; Easy access to food; End malnutrition in all its form, with special attention stunting, by securing year-round access to sufficient, safe, affordable, diverse and nutritious food; Ensure universal year-round access to affordable, adequate, safe and nutritious food for all; Eradicate child malnutrition and

know-how, including through new information and communications technologies (Rio+20 para. 114).  

- Address limitation of export restrictions on staple food products; Increase open and functioning markets and trade, including by eliminating harmful agricultural subsidies; Elimination of incentives and agricultural subsidies in developed countries; Comply with the agricultural mandate of the Doha Round in the WTO to eliminate all forms of export subsidies, substantially reduce domestic support and substantially improve market access; Comply with the mandates on fisheries subsidies in the Doha Round and in the Rio+20 outcome document. Increase market access for agricultural products from developing countries by 2020. Ensure an equitable multilateral trade system that promote rural development and food security; Establish concrete measures and rules to put into effect the principle that developing countries be enabled to promote food security, farmers’ livelihoods and rural development in the multilateral trade rules, as well as in other trade agreements. Reaffirm the prime importance of food security in developing countries (Rio+20 para 108) and that trade rules and negotiations have to recognise and respect this priority, as well as to promote the livelihoods and incomes of small farmers in developing countries. Ensure an equitable multilateral trade system that promote rural development and food security;

Focus area 3. Health and population dynamics

Realizing the right to the highest attainable standard of mental and physical health and improving healthy life expectancy is a widely shared endeavour. Some areas that could be considered include:

From Focus Area Document:

a) universal health coverage;
b) strengthening health systems, including through increased health financing, development and training of the health workforce, and access to safe, affordable, effective and quality medicines, vaccines and medical technologies;
c) ensuring affordable essential medicines and vaccines for all;
d) dissemination of medical and public health knowledge, including traditional knowledge;
e) elimination of preventable child and maternal deaths;
f) significant reduction of child morbidity;
g) End the HIV/AIDS epidemic;
h) preventing and treating communicable diseases, including malaria, tuberculosis, and neglected tropical diseases;
i) addressing non-communicable diseases (NCDs) inter alia through promoting healthy diets and lifestyles, including for youth;
j) tackling environmental causes of disease;
k) access to sexual and reproductive health, including modern methods of family planning;
l) providing for the health needs of persons with disabilities, youth, migrants, and ageing populations;
m) eliminating harmful practices;
n) reducing road accidents; and
o) appropriate means of implementation.

Goals and targets suggested by Member States, Major Groups and Other Stakeholders:

- Improve healthy life expectancy, including reduction of the burden of disease from HIV/AIDS, tuberculosis, malaria, neglected tropical diseases and priority non-communicable diseases; Reduce the environmental causes of disease such

207 To be determined in the context of Focus area 18.

208 Guatemala/Colombia
as exposure to harmful pollutants and substances, unsafe
drinking water, and insufficient nutrition\textsuperscript{209}; Prevent and
treat communicable diseases, including HIV/AIDS, malaria
and tuberculosis\textsuperscript{210}; Prevent and treat non-communicable
diseases (NCDs)\textsuperscript{211}; preventing, early diagnosing and treating
non-communicable diseases (NCDs)\textsuperscript{212}; Tackle environmental
causes of disease, in particular air pollution, as well as
exposure to harmful substances\textsuperscript{213}; Elimination of the
HIV/AIDS epidemic and prevention and reduction of malaria
and other tropical diseases\textsuperscript{214}; Decrease the incidence of
non-communicable diseases (through reducing exposure to
harmful use of tobacco, alcohol, hazardous substances,
unhealthy diets and other risk factors)\textsuperscript{215}; Address social
and environmental causes of disease, which has clear
linkages to other goals\textsuperscript{216}; Achieve universal access to HIV
prevention, treatment, care and support and to eliminate
mother to child transition of HIV\textsuperscript{217}; Strengthen the fight
against malaria, tuberculosis, and neglected tropical
diseases\textsuperscript{218}; Dampen the threat of non-communicable diseases,
such as cardiovascular diseases, diabetes, cancer, and
chronic respiratory diseases through the development and
implementation of comprehensive and integrated and multi-
sector policies and strategies, and their prioritization on
the development agenda of Member States\textsuperscript{219}; Reduce the burden
of the priority diseases, both communicable and non-
communicable, and promote mental health\textsuperscript{220}; Reducing the
burden of disease from HIV/AIDS, tuberculosis, malaria,

equality and women’s empowerment, shapes cultures, values and creates a skilled labour force. Some areas that could be considered include:

From Focus Area Document:

a) universal, free primary and secondary education for girls and boys;

b) ensuring equitable access to education at all levels with focus on the most marginalized, including indigenous peoples, ethnic minorities, persons with disabilities, persons living in rural areas, and migrants;

c) achieving high completion rates at all levels of education for both girls and boys;

d) providing universal early childhood education;

e) ensuring effective learning outcomes at all levels and imparting knowledge and skills that match the demands of the labour market, including through vocational training and skills development for youth;

f) universal adult literacy and lifelong learning opportunities for all;

g) integrating sustainable development in education curricula, including awareness raising on how culture advances sustainable development; and

h) appropriate means of implementation[^333].

Goals and targets suggested by Member States, Major Groups and Other Stakeholders:

- Ensure universal free primary and secondary education for girls and boys and ensuring equitable access to education at all levels with a focus on the most marginalized, including indigenous peoples, persons living in rural areas[^334]; Ensure every child, regardless of circumstance, completes primary education able to read, write and count well enough to meet minimum learning standards[^335]; Ensure every child, regardless of circumstance, has access to lower secondary education and increase the proportion of adolescents who achieve recognised and measurable learning outcomes to x%[^336]; Universal, free primary and secondary

Address and minimize international constrains to the ability of developing countries in particular to carry out expenditure in education sectors and for public employees.

Focus area 5. Gender equality and women’s empowerment

Provision of equal opportunities for men and women, boys and girls, is necessary for the full realization of their rights, their potential, and their contribution to sustainable development. Some areas that could be considered include:

From Focus Area Document:

a) ending all forms of discrimination against women of all ages;

b) ending violence against girls and women in all its forms;

c) ensuring equal access to education at all levels;

d) ensuring equal employment opportunities for women and equal pay for equal work;

e) equal access to assets and resources, including natural resources management;

f) ensuring equal participation of women in decision-making in public and private institutions;

g) ending child, early and forced marriage;

h) reducing the burden of unpaid care work;

i) sexual and reproductive health and reproductive rights;

j) promoting the availability of gender disaggregated data to improve gender equality policies, including gender sensitive budgeting; and

k) appropriate means of implementation.

Goals and targets suggested by Member States, Major Groups and Other Stakeholders:

- Preventing and eliminating all forms of violence against girls and women and ending discrimination; End all forms of violence against women and children; End violence

inheritance; Ensure women's right to work and rights at work through gender-responsive policies and programs that promote women's economic empowerment; Enhance equal employment opportunities from women and equal pay for equal work.

- By 2030, all countries have reduced and redistributed unpaid care and domestic work through shared responsibility by states, the private sector, communities, men and women. Care is incorporated into social protection systems through allowances, services and benefits that maximize women’s autonomy, and guarantee their rights, dignity, well-being and enjoyment of free time. This requires that woman and men take part in a parity scheme in all decision-making spaces, especially in financial and environmental fields; reducing the burden of unpaid care work, acknowledging the positive correlation between minimum wage, poverty eradication and social inclusion. Ensuring equal sharing of unpaid work, and ensuring valorization, reduction and redistribution of unpaid care work; Reduce and redistribute unpaid care and domestic work, done mostly by women and migrant domestic workers.

- Ensure women’s equal political representation and participation. Ensure universal access of women to civil, economic and political participation by 2030; Achieve at least 50% women employees in the public sector with at least 50% of management positions held by women; Ensure equal participation of women in political, economic, and

of voluntary innovative financing mechanisms, and increase priority to gender equality in official development assistance.\(^{524}\)

**Focus area 6. Water and sanitation**

For a water-secure world and for the realization of the right to safe drinking water and sanitation, the whole water cycle has to be taken into consideration to tackle water-related challenges.\(^{525}\) Some areas that could be considered include:

**From Focus Area Document:**

- a) ensuring access to safe and affordable drinking water and adequate sanitation for all, especially for women and girls, including in households, schools, health facilities, workplaces and refugee camps;
- b) providing adequate facilities and infrastructure, both built and natural, for safe drinking water and sanitation systems in all areas;
- c) extending wastewater treatment, recycling and reuse;
- d) improving water-use efficiency;
- e) bringing fresh water extraction in line with sustainable supply;
- f) enhancing effective water governance including catchment area based integrated water resources management and appropriate trans-boundary co-operation;
- g) expanding water-related vocational training at all levels;
- h) protecting and restoring water-linked ecosystems like mountains, watersheds and wetlands;
- i) eliminating the pollution and dumping of toxic materials in water bodies, and protecting aquifers;
- j) eliminating of invasive alien species in water bodies;
- k) investing in water harvesting technologies;
- l) reducing risks and impacts of water-related disasters; and
- m) appropriate means of implementation.\(^{526}\)

**Goals and targets suggested by Member States, Major Groups and Other Stakeholders:**

\(^{524}\) On behalf of Women, Children & Youth, Local Authorities, NGOs and the Feminist Taskforce

\(^{525}\) Brazil/Nicaragua proposed deletion of “water-secure world” and inclusion of “with full respect to state sovereignty” at the end.

\(^{526}\) To be determined in the context of Focus area 18.
• Establish a goal for recycling and reusing water as well as for nutrients and recovered organic material in treated water; Increase the efficiency of water use in the agricultural sector; Protect the services of mountain ecosystems and their biodiversity and ensure the proper management of water and other natural resources; Effective management and sustainable use of water resources at the local, national and regional level, taking into account the effects of climate change; Improve the sustainable use and development of water resources; By 2030, improve by 50% the sustainable use and increasing water productivity for economic growth; By 2030, reduce wastewater by more than half and increase by more than half its reuse; By 2030, double the count of rainwater harvesting in all countries; Manage water resources at the basin level in an integrated way, including in transboundary basins; Bring freshwater withdrawals in line with sustainably available water resources respecting ecosystems requirements; Increase water efficiency in agricultural and food production, industry and energy generation, also in support of equitable and sustainable growth; Increase the efficiency of water use in agriculture and industry; Improved water productivity, recycling and water-use efficiency; A zero target on

MOI

- Mobilization of additional resources, especially for developing countries; facilitate access to water- and sanitation-related technologies, especially water harvesting technologies and wastewater treatment, recycling and reuse technologies; enhance capacity-building, in particular through expanding international cooperation for water-related vocational training at all levels 596

- Provide enhanced financial and technical support to LDCs to improve and expand water and sanitation provision, including water pipelines and sewage networks (based on IPoA) 597; Help LDCs preserve and develop water sources, manage water sheds and enhance water productivity, including through sub-regional and regional collaborations (IPoA) 598

**Focus area 7. Energy**

Energy plays a critical role in economic growth and social development. Ensuring access to affordable, modern and reliable energy resources for all is also important for poverty eradication, women’s empowerment, and provision of basic services. Some areas that could be considered include:

**From Focus Area Document:**

a) ensuring universal access, for both women and men, to modern energy services;
b) deployment of cleaner, including low- or zero-emissions energy technologies;
c) increasing the share of renewable energy in the global energy mix, including by providing policy space and necessary incentives for renewable energy;
d) improving energy efficiency in buildings, industry, agriculture and transport;
e) phasing out inefficient fossil fuel subsidies that encourage wasteful consumption;

596 Brazil/Nicaragua
597 Benin/LDCs
598 Benin/LDCs
f) building capacity and transferring modern energy technologies;
g) mobilizing finance to invest in modern energy infrastructure;
h) sharing knowledge and experience on appropriate regulatory frameworks and enabling environments;
i) promoting partnerships on sustainable energy; and
j) appropriate means of implementation. 599.

Goals and targets suggested by Member States, Major Groups and Other Stakeholders:

- Universal access to modern energy services and energy technologies 600; Widening the access and use of renewable energy 601; Universal access to clean, renewable, and affordable modern energy services by 2020 602; Ensure universal access to modern energy services 603; Enhance capacities in energy production, trade and distribution with the aim of ensuring access to energy for all by 2030 604; Universal access to energy can only be achieved through a new generation of global partnership involving governments, international organizations, civil society, foundation and the private sector 605; Ensuring universal access to modern energy services 606; Supporting national enabling environments, including energy policy frameworks, for universal access to sustainable energy 607; Ensuring universal access, for both women and men, to modern energy services 608; Achieve universal access to modern energy

- Establish data repositories for the storage and sharing of energy-related data, vital for sustainable energy projects and implementation\(^{670}\);

- Strengthen transparency and financial regulation of energy markets\(^{671}\);

- Establish absolute caps to reduce (over-)consumption, especially in Northern countries to halt the current procurement of questionable energy sources from mega dams and large-scale wood-based bioenergy including mono-crops from the South\(^{672}\);

MOI

- Provide enhanced financial support to LDCs to invest in modern energy infrastructure including energy production, trade and distribution with a view to ensuring access to energy for all (IPoA)\(^{673}\); Provide modern energy technologies, including low or zero emissions energy technologies to LDCs on a preferential basis\(^{674}\);

**Focus area 8. Economic growth**

Achieving sustained and inclusive economic growth for sustainable development remains the surest means of eradicating poverty and attaining shared prosperity. At the same time, growth should be pursued in ways that bring beneficial environmental and social impacts. Some areas that could be considered include:

**From Focus Area Document:**

a) enhancing macroeconomic policy coordination;

\(^{670}\) AOSIS

\(^{671}\) France/Germany/Switzerland

\(^{672}\) Women, Indigenous Peoples, SLoCaT and IBON

\(^{673}\) Benin/LDCs

\(^{674}\) Benin/LDCs
b) fostering conducive regulatory and fiscal systems to promote sustainable development;
c) encouraging structural transformation towards higher productivity sectors and activities;
d) substantially improving energy and resource productivity of economic activities;
e) promoting entrepreneurship, small and medium scale enterprises, and innovation;
f) creating productive, well-paid jobs;
g) promoting investments in infrastructure such as roads, railways, ports, electricity, and communications;
h) strengthening productive capacities in all countries with a particular focus on LDCs, including through technological upgrading and value addition;
i) promoting an open, rules-based, non-discriminatory and equitable multilateral trading system;
j) promoting trade facilitation and preferential market access for LDCs;
k) ensuring debt sustainability;
l) facilitating international technology cooperation and technology transfer, particularly for environmentally sound technologies;
m) developing and using evidence-based, high quality, timely, disaggregated data sources; and
n) appropriate means of implementation.

Goals and targets suggested by Member States, Major Groups and Other Stakeholders:

• Increase investment in human and institutional capacity development particularly for developing countries, including those in special situation; Investing in human capital development, integrating the poor and vulnerable groups into productive and income generating activities, and investing in the development of labour skills; Investment in human capital and skills relevant to the labour market; Promote inclusive and job-rich economic growth policies to benefit the poor and the marginalized

\textsuperscript{775} Benin/LDCs
maximizing material recovery, with technology cooperation and transfer to support such development;
c) strengthening institutions that support industrial production, technological upgrading and value addition;
d) investment in sound infrastructure;
e) strengthening productive capacities, with particular reference to industrial sectors;
f) creation of decent industrial sector jobs;
g) encouraging industrial entrepreneurship and enterprise formation;
h) enhancing science and math, engineering and technical skills;
i) ensuring favourable market access for industrial products and processed commodities of developing countries;
j) re-industrialization and retro-fitting of industry as relevant;
k) promoting new industries that supply goods and services for low-income consumers as well as environmentally sustainable products and services; and
l) appropriate means of implementation.

Goals and targets suggested by Member States, Major Groups and Other Stakeholders:

- Ensuring adequate policy space for industrial development, especially in developing countries.

- Sustainable industrial development based on energy- and resource efficient and environmentally sound industrial processes, phasing out harmful chemicals and waste; Promoting sustainable industrial development based on processes environmentally sustainable, using energy and resources efficiently and promoting regeneration and restoration of ecosystems. By 2030, reduce by x% the rate of increase and intensity of carbon emissions from the industrial sector. Advancing sustainable and socially

Favorable market access must be granted to industrial goods from developing countries, in particular least developing countries. Establish and effectively implement a legally binding multilateral code of conduct for TNCs to secure social responsibility and accountability and prevent constraints to domestic industrial policies; Enhancing science and math, engineering and technical skills, including through the intensification of technical and vocational education; Promote rapid industrialization for employment and decent work; Improve technological capability of developing countries as an essential component of industrial development and promoting indigenous technology development in LDCs; Provide enhanced financial and technical support to LDCs (IPoA); Increase the allocation of ODA to LDCs’ priorities with particular focus on productive capacity development (IPoA); Support the development of science and technology to increase agricultural production and productivity; (IPoA)
Focus area 10. Infrastructure

Efficient, productive and globally competitive economies require well-functioning infrastructure. Infrastructure design and development should aim to promote human well-being, productive capacity, efficiency, and environmental protection. In this regard, some areas that could be considered include:

From Focus Area Document:

a) provision of infrastructure for access to modern energy services, as well as provision of reliable and sustainable transport and communications, including road and rail links, ports and ICT connectivity;
b) due account for environmental and social impacts of existing and planned infrastructure from a lifecycle perspective;
c) improving water supply systems, developing irrigation and water harvesting and storage infrastructure for agriculture, and developing sewerage and wastewater treatment;
d) proper use of urban space and related infrastructure planning;
e) improvement of infrastructure necessary for sustainable tourism;
f) addressing trans-border infrastructure needs for trade and related challenges facing developing countries;
g) accessibility to persons with disabilities;
h) planning and building resilient infrastructure including for disaster risk reduction; and
i) appropriate means of implementation

Goals and targets suggested by Member States, Major Groups and Other Stakeholders:

Promote infrastructure for agricultural productivity and rural development; Provision of infrastructure for modern services such as transport, communications, ICT and water, taking due account of environmental and social impacts; Increase development of infrastructure that promotes

811 Sweden
healthy lifestyle for people and the conservation of the environment. Ensure access to modern energy services; improving reliable and sustainable transport networks; Enhance access to and use of information and communications technologies; Building necessary infrastructure for public services, in areas such as health and education, in developing countries; By 2030, double the Internet penetration in all countries particularly the developing world; Significantly increase access to telecommunication services, including cellular phones and ensure providing 100 per cent broadband connectivity (based on IPoA); Achieve rapid development transformation through industrial and infrastructure development; Achieve reliable transport, energy and ICT infrastructure development and maintenance including transit systems for LLDCs; Increase international support measures for LLDCs in infrastructure development;

- Increase access and control over productive assets and market opportunities by all countries, particularly developing countries including those in special situation,

- Promote infrastructure for agricultural productivity and rural development,

- Increase the rate of investment in economic and social infrastructure, inter alia, robust information and communication technology and sustainable transport network,

Focus area 11. Employment and decent work for all

Sustainable development should provide employment and decent jobs for all those seeking work. Some areas that could be considered include:

From Focus Area Document:

a) promoting full employment through macroeconomic policy;
b) addressing youth unemployment through policies and strategies aimed at providing young people with access to decent and productive work;
c) facilitating the participation of women in the labour force;
d) social security and protection including for those retired from the labour force, persons with disabilities, the unemployed, children and youth, and older persons; and
e) eliminating gender-based and other forms of labour market discrimination including against persons with disabilities and older persons;
f) encouraging transition from informal sector to formal sector employment;
g) promoting non-farm employment opportunities in rural areas;
h) ensuring decent wages aligned with productivity;
i) supporting small- and medium-sized enterprises;
j) increasing access to credit to the youth, women and other vulnerable groups;
k) promoting appropriate job-rich technology applications;
l) promoting job-rich sustainable tourism;
m) training and re-skilling for displaced workers;
n) protecting the rights of migrant workers and displaced persons in compliance with the ILO norms and standards; and
o) appropriate means of implementation\textsuperscript{832}.

\textsuperscript{832} To be determined in the context of Focus area 18.
Goals and targets suggested by Member States, Major Groups and Other Stakeholders:

- Achieve full and productive employment.\textsuperscript{833}

- Ensure women’s equal access to employment and equal participation of women in the labour force in all sectors\textsuperscript{834}; Reduce wage income gaps between female and male\textsuperscript{835}; Increase in a significant percentage, the participation rate of women in the workforce\textsuperscript{836}; Full recognition of all forms of work, including domestic work, assistance, care, family and community work\textsuperscript{837}; By 2030, double the increase in employment to population ratio by sex and disability\textsuperscript{838}; Increase the participation of women, youth, and underrepresented or vulnerable groups in decent and productive work\textsuperscript{839}; Protect fundamental rights at work and eliminating gender-based and other forms of labor market discrimination\textsuperscript{840}; Ensure gender equality at work (including eliminating the gender pay gap): Equal pay for work of equal value is fundamental for addressing the disparities in income on the basis of gender.\textsuperscript{841}

• Actions at the level of international economic, financial, trade, technology and social systems, to support and enable developing countries’ efforts in employment objectives\textsuperscript{884}; Refrain from actions by developed countries that create barriers to developing countries’ efforts and progress\textsuperscript{885}

MOI

• Building productive capacity, access to credit, access to and the application of job-rich technologies and providing training and skills including vocational training\textsuperscript{886}

Focus area 12. Promote equality

Inequalities within countries can be socially destabilizing and also have negative consequences for economic growth. Inequalities among countries can have negative effects on global solidarity and international cooperation to address shared challenges. Some areas that could be considered in addressing inequality among social groups within countries include:

From Focus Area Document:

a) eliminating discrimination in laws, policies and practices, including those between women and men;

b) reducing inequalities among social groups, including economic, social, political and environmental inequalities;

c) empowering and inclusion of marginalized groups, including indigenous peoples, minorities, migrants, refugees, persons with disabilities, older persons, children and youth;

d) ensuring equality of economic opportunities for all, including marginalized groups;

e) strengthening social protection systems, and social protection floors as relevant;

f) promoting differentially high per capita income growth at the bottom of the income distribution;

g) working towards inclusive societies that respect and promote cultural diversity;

\textsuperscript{884} Bolivia/ Group of 77

\textsuperscript{885} Bolivia/ Group of 77

\textsuperscript{886} Benin/LDCs
h) developing and using evidence based, high quality, timely, disaggregated data and impartial, internationally established methods for evaluating progress; and
i) appropriate means of implementation\textsuperscript{887}.

Some areas that could be considered in furtherance of greater equality between and among countries through high and sustained growth in developing countries include:

a) promoting an open, rules-based, non-discriminatory and equitable multilateral trading system;
b) curbing illicit financial flows;
c) phasing out harmful subsidies;
d) pursuing policies for planned, well managed and legal migration;
e) reducing the transaction costs of remittances;
f) developing policies to mitigate brain drain; and
g) progress in internal conditions of development, education, inclusive economic growth, sustainable industrialization, infrastructure, energy and relevant means of implementation.

Goals and targets suggested by Member States, Major Groups and Other Stakeholders:

Inequalities within countries:

- By 2030, half the gap between the income ratios of top 10\% and bottom 40\% of a country\textsuperscript{888}; Decrease national income inequality as measured by the ratio of the income of the richest and bottom 10\% of the population.\textsuperscript{889}

- By 2025, affirmative actions in law and policies to reduce ethnic, religious, gender and disability based discrimination\textsuperscript{890}; Expand adoption of comprehensive legal and educational systems to fight discrimination and stigmatization of the marginalized.\textsuperscript{891}

\textsuperscript{887} To be determined in the context of Focus area 18.

Focus area 13. Sustainable cities and human settlements

Building sustainable cities as well as decent and affordable human settlements for all, including for indigenous peoples, and the realization of the right to adequate housing remain important undertakings. Sustainable cities and settlements will be central in addressing socio-economic and environmental challenges and in building resilient societies. Some areas that could be considered include:

From Focus Area Document:

a) eradicating and preventing slum conditions, including by provision of adequate and affordable housing, infrastructure and basic services;
b) providing access to safe, affordable, accessible and sustainable transport, improving road safety and urban air quality;
c) improving waste and wastewater management;
d) strengthening resilience to climate change and natural disasters;
e) access to safe public spaces and services;
f) enhancing capacities for urban planning;
g) strengthening positive economic and social links between cities and peri-urban and rural areas;
h) enhancing social cohesion and personal security;
i) promoting accessible cities for people with disabilities;
j) protecting and safeguarding the world’s cultural and natural heritage, including ancient archaeological sites, intangible and underwater heritage, museum collections, oral traditions and other forms of heritage;
k) appropriate means of implementation.

Provide access to affordable housing, land and housing-related infrastructure and basic services while achieving a significant improvement in the lives of slum-dwellers and rural poor (IPoA)  

- Sustainable transport goal, which would embrace a number of issues, including road safety; Improve access to safe, affordable, accessible and sustainable urban transport, which would also contribute to improving air quality; By 2030, reduce by half the rate of growth of use of personal vehicle and replace it with affordable and safe public transport; Invest in infrastructure to improve access and accessibility to safe and sustainable transport — and improve road safety; Improving access to sustainable transport, including safe and affordable public transport; Universal access to safe, affordable, and sustainable transport, improving road safety, mobility and air quality; Provide access to safe, affordable, accessible and sustainable transport with improved road communications and other infrastructure; sustainable mass transport systems;

- Promote sustainable waste management; Ensure efficient and sustainable waste and wastewater management;
Improving waste and wastewater management; Enhance the carrying capacity of cities; Change sustainable consumption and production patterns; Reduction in per capita food waste at consumer level in the developed countries as well as reduction in per capita energy consumption in developed countries reducing pollution and wastes.

- Promote climate and disaster resilient practices. Enhance capacities of local governments for building resilience to climate change and natural disasters in urban planning; By 2030, increase by 20% the number of cities adopting and implementing policies and plans towards resilience and adaptation to climate change. Improve resilience to climate change and reduce risks of disasters: encourage the initiatives of local and regional authorities for mitigation and adaptation to climate change; implement territorial climate plans; develop sober, sustainable mobility and networks; reduce the risks of disasters and build mechanisms to prevent and respond to them; Strengthening resilience to climate change and natural disasters, including water-related disasters; Enhancing capacities for integrated urban planning; Enhancing...
social cohesion and personal security. Reduce greenhouse gas emissions; 

- Promote optimizing urban planning and management. Accelerate the development of eco-cities; Support the development and the implementation of urban and territorial planning policies, through participatory processes to create more compact and inclusive cities, better integrated and connected, with sustainable infrastructure, transports and other services, encouraging social cohesion and resilience to climate change; Sustainable urban and land planning and implementation, including urban-rural linkages and disaster risk reduction, as well as resilient infrastructure; Provide reliable and affordable access to basic services and improve access to secure and affordable housing and land tenure; Build the capacities of local and regional authorities for planning and implementing urban policies, while supporting their institutional and financial capacities; Promote sustainable urban planning encompassing economic, social and environmental sustainability, intensified rural-urban interaction and social cohesion Improve functions of cities; Develop an integrated urban and rural development system that facilitate economic transformation. Strong economic and social links between cities, rural areas and peri-urban areas; Enhancing people-centered urbanization;

resource depletion and environmental sustainability. Industrialized societies\textsuperscript{968} and economies would lead a shift to sustainable consumption and production patterns, with other countries benefiting from their experience and know how. The 10-Year Framework of Programmes on SCP is the principal framework for international cooperation and will need to be adequately resourced. Some areas to be considered include:

\textbf{From Focus Area Document:}

a) significantly improving energy efficiency and materials productivity;
b) sustainable supply chains;
c) preventing, reducing, recycling and reusing waste;
d) reducing waste in food production and consumption, including through traditional knowledge;
e) sound management of chemicals and hazardous materials in accordance with agreed frameworks;
f) sustainable buildings and construction;
g) awareness raising, education for creating a culture of sustainable lifestyles;
h) providing sustainability information on products and services to consumers to enable informed decisions;
i) fostering collaboration among the academic, scientific and technological community to advance technologies for sustainable consumption and production;
j) sustainable public procurement;
k) sustainable tourism promotion;
l) enhanced reporting on corporate social and environmental responsibility, including integrated reporting, and sustainable finance;
m) appropriate means of implementation\textsuperscript{969}.

\textsuperscript{968} Brazil/Nicaragua: propose to change “industrialized societies” to “developed countries”.

\textsuperscript{969} To be determined in the context of Focus area 18.
Goals and targets suggested by Member States, Major Groups and Other Stakeholders:

- Sustainable public procurement; Sustainable public procurement policies; Consider increasing the proportion of sustainable public procurement; Increase the market share of sustainable products and services, including through competitive and transparent public private procurement processes that follow sustainable development guidelines; By 2020, all public procurement will follow sustainable development guidelines, with no procurement going to environmentally harmful activities;

- By 2020, all governments put an end to environmentally perverse subsidies, and have realised fiscal reforms that systematically support efficient use of natural resources, including through re-using and recycling;

- Reporting on corporate social and environmental responsibility; Implement corporate social and environmental responsibility; Reduce the negative externalities of natural resource exploitation by strengthening resource governance, promoting sustainable exploitation of renewable resources, reducing corruption and enhancing accountability and transparency; Consider the use of economic, social and environmental accounts by

---

970 African Group proposed a goal “Enhance the quality, resilience and protection of the environment and promote sustainable exploitation, use and management of natural resources” which encompass targets on FA14 and FA17; Southern Africa Region proposed a goal “To build resilience in order to withstand the impact of environmental changes” cutting cross FA13, 14 and 15.

environmental degradation. By 2030, expand the scope of legally-binding obligations under national and international law in the field of chemicals management to include all chemicals of concern and have substituted all highly hazardous pesticides with safer alternatives. Preventing, reducing, recycling and reusing waste, in accordance with waste production per capita.

- Promoting the use of best available techniques within all sectors of production, resource efficiency and sustainable product design, taking a life cycle approach; Increase material-, resource- and energy-efficiency; Increase share of renewable energy; Increase the efficiency with which we use our natural resources; Increase natural resource regulatory frameworks which incorporate effective mechanisms for environmental and social sustainability; Highlight the importance of a product life-cycle approach in helping and informing the most effective and efficient use of resources and their improved governance; Significantly improving energy efficiency and materials productivity. The rate of improvement must be proportional to the consumption per capita.

- Promoting sustainable management and use of natural resources; Promoting conservation and sustainable utilization of natural resources; Development of policies

a strong and effective agreement in 2015. Some areas to be considered include:\textsuperscript{1018}

\textbf{From Focus Area Document:}

a) reaffirming and reinforcing existing international commitments, such as limiting the increase in global average temperature through equitable reductions in greenhouse gas emissions;
b) building resilience and adaptive capacity in all vulnerable countries;
c) introducing, inter alia, economic incentives for investments in low-carbon solutions in infrastructure and industry;
d) developing low-carbon, climate-resilient development strategies and plans;
e) reducing the damage caused by climate-induced and other natural hazards through disaster risk reduction;
f) improving education and awareness raising on climate change; and
g) appropriate means of implementation\textsuperscript{1019}

\textbf{Goals and targets suggested by Member States\textsuperscript{1020}, Major Groups and Other Stakeholders:}

\begin{itemize}
\item Hold the increase in global average temperature below 2\textdegree C above pre-industrial levels, in line with international agreements\textsuperscript{1021}; Hold the increase in global average temperature below 2\textdegree C above pre-industrial levels\textsuperscript{1022}; Keep global average temperatures below 1.5\textdegree C above pre-
\end{itemize}

\textsuperscript{1018} Brazil/Nicaragua propose revision of chapeau: “Climate change poses the gravest threat to sustainable development and poverty eradication. All considerations related to this issue must be crafted in accordance with the agreements under the UNFCCC and its principles and provisions, including equity and common but differentiated responsibilities and respective capabilities, and support greater ambition in the ongoing negotiations towards a fair, effective and balanced agreement in 2015.”

\textsuperscript{1019} To be determined in the context of Focus area 18.

\textsuperscript{1020} Southern Africa Region proposed a goal “To build resilience in order to withstand the impact of environmental changes” cutting across FA13, 14 and 15.

\textsuperscript{1021} Australia/Netherlands/UK

\textsuperscript{1022} France/Germany/Switzerland
By 2020, global carbon emissions have peaked and by 2030, the atmospheric contents of carbon have stabilized to an acceptable level; Integrate climate adaptation and emissions reductions into development plans and poverty reduction strategies; Address loss and damage experienced by developing countries disproportionately impacted by global greenhouse gas emissions, with appropriate international support; By 2030, carbon intensity from global energy consumption is reduced by 20%; Greenhouse gas (GHG) emissions peak before 2020 and then rapidly decline to achieve zero carbon emission around the middle of the century through gender-responsive, socially just and environmentally sound national actions; Urgently phase out economic activities incompatible with planetary boundaries and ensure there is adequate redress of damage based on the ‘polluter pays’ principle;

- Combating climate change and promoting adaptation to its adverse effects through the implementation of policies and measures at national, regional and international levels consistent with existing and future commitments under the UNFCCC;

- Reduce poor people’s vulnerability and strengthen their resilience to climate change, environmental hazards and natural disasters; Increase capacities for and access to disaster risk management in order to reduce the social and economic impacts of natural hazards and increase the

• Ensure the long-term survival of all SIDS confronting the adverse effects of human induced climate change; Provide enhanced financial support to LDCs, including through green climate fund and LDCs fund; Make specific provisions on access to technologies for building resilience and adaptive capacity; Significantly increase the Clean Development Mechanism (CDM) projects and activities in LDCs.

• Ensure full actualization and disbursement of adequate, appropriate and new climate finance through effective means of implementation, ensuring gender-sensitive social and environmental safeguards. By 2030, ensuring 50% of international climate finance resources are allocated to adaptation actions. By 2020, the goal for meeting mobilization of US $ 100 Billion is met.

• Introducing, inter alia, economic incentives for investments in low-carbon solutions in infrastructure and industry, especially in developed countries.

• Recognizes traditional knowledge, strategies for resilience, and meaningful participation of impacted communities and peoples within the development of national and international policies, standards and measures pertaining to climate change prevention, adaptation and mitigation.
Focus area 16. Conservation and sustainable use of marine resources, oceans and seas

The conservation and sustainable use of marine resources, oceans and seas ensures the provision of economic and social benefits and ecosystem services to humankind. Some areas that could be considered include:

From Focus Area Document:

a) reducing marine pollution and debris including from land-based activities;
b) halting destruction of marine habitat including ocean acidification;
c) promoting sustainable exploitation of marine resources;
d) regulating harvesting of straddling fish stocks;
e) addressing illegal, unreported and unregulated (IUU) fishing, and destructive fishing practices;
f) encouraging sustainable small-scale fisheries;
g) eliminating harmful subsidies that promote fishing overcapacity;
h) ensuring full implementation of regional and international regimes governing oceans and seas;
i) establishing Marine Protected Areas;
j) protecting marine resources in areas beyond national jurisdiction;
k) sustainable management of tourism; and
l) appropriate means of implementation.

Goals and targets suggested by Member States, Major Groups and Other Stakeholders:

- Address marine pollution, destruction of marine habitat and ocean acidification; Combating pollution and litter and establishment of marine protected areas, including in areas

\[1050\] To be determined in the context of Focus area 18.
\[1051\] African Group proposed a goal “Combat desertification, land degradation and drought and promote sustainable management of land and oceanic spaces” which cuts across FA16 and FA17. Southern Africa Region proposed to link it to Cluster 5 (FA13, 14, 15).
\[1052\] Bangladesh
beyond national jurisdiction; Reduce the incidence and impacts of marine pollution from marine and land-based sources by x; Ensure that coastal and island communities have adequate resources and management capacity in place for effective adaptation to the impacts of ocean warming and ocean acidification, including climate change-induced displacement of coastal and island peoples; Reduce marine pollution and debris, including from land-based activities; Address ocean acidification; Protecting the coastal degradation including salinization; Reduce the incidence and impact of pollution on marine ecosystems; Protecting vulnerable marine areas and restoring damaged habitats; Reducing land-based pollution, including plastic debris; Reducing biodiversity loss and establishing and implementing integrated oceans use plans to prevent conflict. All types of maritime uses are effectively managed and controlled and all types of marine environmental impacts, (including the effects of climate change and the different types of land-based pollution) are assessed, understood, and mitigated;

- Marine ecosystems are restored and safeguarded, marine biodiversity is effectively protected and fish stocks, are rebuilt and maintained at healthy and productive levels; Enhance the protection of oceans and seas and marine resources; Coastal and marine areas critical to food

• Increase the capacity to achieve sustainable management of tourism activities\textsuperscript{1121}; Provide support for sustainable tourism activities\textsuperscript{1122}

• Integrate the principles and strategies of “ocean-based economy” in national economies to help eradicate poverty, move toward a low-carbon economy, enhance social inclusion, improve human welfare, and create job opportunities in coastal and island communities, while maintaining healthy oceans\textsuperscript{1123}

• Increase by x\% by 2030 the economic benefits from sustainable use of living marine resources in particular, in least developing countries, African countries and small island developing states\textsuperscript{1124}

Focus area 17. Ecosystems and biodiversity

Humans are fundamentally dependent on the capacity of ecosystems for life and to provide services for their well-being and societal development. Relevant areas that could be considered include:

From Focus Area Document:

a) protecting threatened species and halting loss of biodiversity;

b) stopping poaching and trafficking of endangered species;

c) maintaining the genetic diversity of both farmed species and their wild relatives;

d) ensuring fair and equitable sharing of the benefits from the utilization of genetic resources;

e) promoting sustainable forest management;

f) slowing, halting and reversing deforestation and conversion of forests to crop lands;

\textsuperscript{1121} Peru/Mexico

\textsuperscript{1122} PSIDS/Papua New Guinea

\textsuperscript{1123} PSIDS/Papua New Guinea

\textsuperscript{1124} Iceland
g) restoring degraded forest ecosystems and increasing area of protected forests;
h) supporting measures to protect mountain ecosystems;
i) achieving a land-degradation-neutral world;
j) ensuring inclusion of indigenous and local communities in decision making and in sharing of benefits derived from conservation and sustainable use of forests and other cultural and natural assets;
k) promoting and protecting traditional knowledge of indigenous peoples;
l) developing and using evidence based, high quality, timely, disaggregated data and methodology for evaluating progress; and
m) appropriate means of implementation

**Goals and targets suggested by Member States**, **Major Groups and Other Stakeholders**:

- Protection of critical eco-systems; Biodiversity and ecosystem services must be appropriately valued and taken into account; Conservation and sustainable use of biodiversity; Enhance ecological conservation; Wealth accounting and valuation of biodiversity and ecosystems in relevant national strategies and national accounts; Integration of sustainable natural resource management, ecosystems, and biodiversity into development planning and decision-making at different levels; ensure effective mechanisms are in place to safeguard ecosystems, species and genetic diversity; Sustainable management of marine

Focus area 18. Means of implementation/Global partnership for sustainable development

The means of implementation are an integral component in achieving sustainable development, including trade, financing for sustainable development, capacity building, and development and transfer of environmentally sound technologies. In this regard global partnership for development has been emphasized as key to unlocking the full potential of sustainable development initiatives. While developing countries still require external support for their domestic sustainable development programmes, their own domestic actions are equally crucial. Special consideration should be given to the needs of countries in special situations, African countries, LDCs, LLDCs, and SIDS as well as specific challenges facing the middle-income countries. International development cooperation through a strengthened global partnership for sustainable development is critical. Some areas that could be considered include:

From Focus Area Document:

a) further progress on development-supportive trade reforms within an open, rules-based multilateral trading system;

b) recommitment by developed countries to meet ODA targets on an agreed timetable;

c) enhancing accountability in development cooperation based on agreed principles;

d) mobilizing additional financial resources from multiple sources such as remittances, foreign direct investment, institutional and other long-term investors and innovative financing;

e) reducing the transaction costs of remittances;

f) enhancing scientific and technological cooperation involving developing countries and technology transfer to developing countries;

g) strengthening capacity building efforts for developing countries and knowledge sharing and technical cooperation among all countries through South-South, North-South and triangular cooperation;

---

1188 Brazil/Nicaragua

1189 Southern Africa Region
h) strengthening capacities for tax-collection, reducing tax evasion;
i) strengthening systems of domestic savings;
j) reducing illicit financial flows;
k) improving efficiency of public spending, reducing corruption;
l) strengthening capacities for disaggregated and expanded data collection for measuring progress; and
m) regular monitoring and reporting of progress with means of implementation and aid efficiency, in conjunction with SDG progress reporting.

To provide impetus to Global Partnership for Sustainable Development and broader stakeholder engagement in sustainable development, some areas that could be considered include:

a) greater involvement of public and private sector business and industry, including financial institutions;
b) strengthening commitment and involvement of multilateral financial development institutions;
c) enhanced involvement of philanthropic organizations;
d) creating inclusive initiatives and partnerships in support of all areas;
e) such initiatives and partnerships to develop resource mobilization strategies;
f) system of regular monitoring, reporting on achievements of initiatives and partnerships; and

g) close coordination and cooperation of multi-stakeholder initiatives and partnerships with government and intergovernmental efforts in support of sustainable development.

Goals and targets suggested by Member States, Major Groups and Other Stakeholders:

On ODA:

- Ensure the fulfilment of ODA commitments of 0.15-0.20 per cent of the GNI of the development partners to the LDCs by 2020; and the alignment of aid with LDCs national priorities forthwith[^1190]; Donor countries should review their ODA commitments in 2015 and commit to allocate at least 50% of ODA to LDCs[^1191]; Fulfilling commitments on official

[^1190]: Benin/LDCs
[^1191]: Benin/LDCs
development assistance to developing countries, including SIDS\textsuperscript{1192}; Directing financial flows, including ODA to those countries (including Least Developed Countries, Small Island Developing States and Landlocked Developing Countries) and sectors where the need is greatest\textsuperscript{1193}; A recommitment from the developed countries to meet quantity and quality of ODA targets, with a marked proportion for gender equality\textsuperscript{1194}; Increase the allocation of ODA to LDCs’ priorities with particular focus on productive capacity development (IPoA)\textsuperscript{1195} Commitment by developed countries to meet ODA targets on an agreed timetable, and ensure the provision of adequate financial resources for sustainable development in developing countries to enable them to achieve SDGs, including the fulfillment of the commitments by many developed countries to achieve the target of 0.7 per cent of gross national product for official development assistance (ODA)\textsuperscript{1196}; make development assistance more effective and predictable by providing developing countries with regular and timely indicative information on planned support in the medium term\textsuperscript{1197} By 2020, fulfil all commitments related to ODA to developing states.\textsuperscript{1198} Make development assistance more effective and predictable by providing developing countries with regular and timely indicative information on planned support in the medium term\textsuperscript{1199}; By 2020, eliminate all barriers to remittance flows to developing countries\textsuperscript{1200}; By 2020, return all illicit financial resources to countries of origin\textsuperscript{1201}; Intensify development financing according to Monterrey Consensus. ODA still represents the main source of international financing for many developing countries. Developed countries should

their own development and the means of implementation will need to be adapted to the specific needs and capacities of each country\textsuperscript{1215}; Address the special needs of LDCs, LLDCs and SIDS\textsuperscript{1216}; Developed countries that have not done so to make concrete efforts towards the target of 0.7% of gross national product (GNP) as official development assistance to developing countries. Other countries in a position to do so are encouraged to set and achieve voluntary targets\textsuperscript{1217}; Developing countries require continued and strengthened international cooperation in finance including the fulfilment of the commitments related to ODA, debt relief, technology transfer and capacity-building if they are expected to achieve the SDGs\textsuperscript{1218}; Developed countries should honor their Official Development Assistance (ODA) commitments, provide development assistance, and scale up their support for developing countries\textsuperscript{1219}.

**On external debt:**

- Address the debt problem of LDCs on a sustainable basis, including through the cancellation of the multilateral and bilateral debt owed by least developed countries to creditors, both public and private\textsuperscript{1220}; Ensure long-term debt sustainability and address issues of sovereign debt\textsuperscript{1221}; Ensure developing countries achieve debt sustainability through debt financing, debt relief and debt restructuring\textsuperscript{1222}; Cancel external debt of heavily indebted poor countries (HIPC)s to reduce debt distress\textsuperscript{1223}; Ensure developing countries achieve debt sustainability through debt financing, debt relief and debt restructuring\textsuperscript{1224};

Enhance debt sustainability; Effective assistance to developing countries in the area of debt relief;

On New and additional financing

- Adopt, expand and implement dedicated investment promotion regimes for LDCs; Encouraging responsible, stable, long-term private foreign investment and inclusive finance,
- Explore new, additional, long-term innovative sources of finance and strengthen and scale up existing ones; and earmark at least 50 per cent of such financing for LDCs.
- Improve resource mobilization for financing development, provide timely financial and technical support and establish new innovative finance mechanism and scale up existing ones.
- Establishment and implementation of financial mechanism at all levels to facilitate financing capital formation for sustainable development programs; Provisioning of predictable additional financial resources for sustainable development; Supporting developing countries create an enabling environment to attract and effectively utilise development finance; Mobilising all financial flows, including innovative sources of finance for sustainable development; Facilitate sufficient, additional and predictable financial resources to developing countries, especially SIDS to build their resilience capacities and capabilities including in climate change mitigation and adaption projects; Steady and predictable access to adequate financing and technology

barriers to remittance flows to developing countries; reduce transaction costs of remittances and facilitate working conditions for migrants, e.g. through measures to enhance the portability of skills and earned social security benefits and to combat discrimination. Tackling illicit financial flows, tax evasion and corruption.

On domestic resource mobilization:

- Enhance support for domestic resource mobilization of LDCs through comprehensive measures and cooperation including through investment in productive sectors in order to significantly increase the domestic resources to GDP ratio; Support to strengthen institutional capacity and regulatory frameworks for preventing corruption, bribery and money laundering, the illegal transfer of funds and other illicit activities by both public and private entities; Strengthening support to developing countries, especially SIDS, in their efforts to develop and implement national development strategies and programs; Curbing illicit financial flows and eliminating tax havens; Ensuring policy coherence for sustainable development; Strengthening domestic resource mobilization; including by: improving tax collection and the efficiency of public spending; reducing illicit flows and tax evasion and avoidance and improving stolen asset recovery; taking measures to promote debt sustainability; improving transparency of governments and companies, and securing revenue from natural resources; combatting corruption and strengthening anti-money laundering; and strengthening

markets, including through ensuring favourable terms for commodity-dependent Domestic Companies in contracts with Trans-National Companies to enable them to add more value to commodities and obtain more revenues from commodity-related activities. Reforming the international monetary system to support sustainable development and addressing the shortcomings in the exchange rate and the international reserves systems. By 2020, strengthen capacities of national institutions to enable them respond to the needs of Member States; Eliminate all conditionalities for lending and access to other forms of support to developing states; Peaceful and non-violent societies, rule of law and capable institutions are both enabling conditions of sustainable development and a result of achieving sustainable development. Cut Illicit Financial Flows (IFFs) by 50% by 2020, halt flows by 2025, and repatriate them to their countries of origin by 2030; Improve fair, just, inclusive and orderly international financial system, aiming to increase representation and voice of developing countries, implement IMF 2010 quota and governance reform agreement; Improve financial regulation system, strengthening regulation of cross border capital flow and commodities price volatility; Countries especially developed countries should pursue responsible macroeconomic policies and reform measures, strengthening policy coordination and international cooperation, to ensure the stability of the global financial system and avoid negative spillover effects on developing countries; Enhancing the voice and participation of developing countries, including SIDS in international financial institutions (IFIs);
Reforms in global economic governance including the maintenance of global financial stability; Better regulation of international financial system; Reform of global economic governance to give developing countries real voice and participation; In fulfilling their SDGs, developing countries should be supported by an enabling international environment, which includes a supportive and just economic and financial international system where the rules are fair and pro-development, as well as a genuine global partnership to enable developing countries to achieve the SDGs; Recognize the urgent need to enhance coherence and consistency of the international monetary, financial and trading systems; Underline the importance of improving global economic governance and strengthen the United Nations leadership role in promoting development; A genuine departure from the market-based policies of development fashioned on the so-called 'Washington Consensus' to a new set of open macroeconomic policies that avoid the contractionary and unequal impact of the liberal approach is needed, in order to maintaining reasonably stable macroeconomic environment, pursuing explicitly long-term growth and employment and lowering income inequality.

On trade:

- Double the share of least developed countries’ exports in global exports by 2020, including by broadening least developed countries’ export base and increase further by three times by 2030; Further enhance market access for all LDC products with full realization of duty-free quota-free commitments on a lasting basis for all LDCs, with

trade-distorting measures and increasing market access to products from developing countries\textsuperscript{1376}

**On Global Partnership and multi-stakeholder partnerships**

- Advanced developing countries would provide enhanced, quantifiable, need-specific support to the LDCs in various areas under a transformative framework\textsuperscript{1377}; Lending full support to research and development of vaccines and medicines for the common diseases in LDCs.\textsuperscript{1378}; Providing support for strengthening the LDC efforts to increase the ratio of health professionals to the population\textsuperscript{1379}; Supporting LDCs to develop their capacity to systematically collect and analyse demographic data to be used, inter alia, for designing appropriate national policies.\textsuperscript{1380}; Fostering scientific, knowledge-sharing, and technical cooperation, including North-South, South-South, and triangular cooperation\textsuperscript{1381}; strengthening the institutional and financial support for South-South cooperation within the UN development system, in particular the United Nations Office for South-South Cooperation.\textsuperscript{1382} Enhancing the global development partnership based on MDG8 in accordance of CBDR for common prosperity and development of all countries. North-South cooperation remains as the core of this partnership and South-South cooperation and triangular cooperation are useful supplement to North-South cooperation. Development financing should be enhanced with North-South cooperation serving as the main channel according to Monterrey Consensus. Developed countries should scale up their support especially ODA for developing countries, especially countries in special situations. Developing countries could further enhance South-South cooperation, help each other in the spirit of solidarity,

ensuring transparency, accountability and reporting on all UN multi-stakeholder initiatives and partnerships; 1393 Strengthened South-South cooperation, that is complementary to North-South cooperation 1394 Developing and implementing comprehensive strategic control mechanism for monitoring, evaluating, and reporting on progress of SDG implementation at all levels 1395 Track existing international commitments, identify gaps and obstacles at all levels in the fulfilment of official development assistance, market access (trade), debt sustainability, access to environmentally sound technologies and medicines. 1396 Strengthen monitoring and evaluation systems 1397 Enhancing accountability in development cooperation based on agreed principles 1398; Establishing a mechanism for monitoring the implementation of the Global Partnership Goal and Targets in accordance with the post-2015 development agenda 1399; Transparency and accountability in implementing the SDGs and the post 2015 agenda 1400

Focus area 19. Peaceful and non-violent societies, rule of law and capable institutions

Creating peaceful, non-violent and inclusive societies, based on respect for all human rights including the right to development, is a cornerstone for sustainable development. Equality within and between countries is a key determinant of peaceful, non-violent and inclusive societies. Some areas that could be considered for strengthening peaceful and non-violent societies include:

From Focus Area Document:
 a) combating organized crime;

1393 Brazil/Nicaragua
1394 LLDCs
1395 AOSIS
1396 African Group
1397 Southern Africa Region
1398 CARICOM
1399 Egypt
1400 Sweden
b) strengthening the rule of law at all levels;
c) reducing illicit arms transfer and trafficking;
d) reduction of crime, violence, abuse, exploitation, including against children and women;
e) promoting information and education on a culture of non-violence;
f) reducing the number of internally displaced persons and refugees;
g) strengthening the fight against human trafficking;
h) improving planned and managed migration policies; and
i) appropriate means of implementation.

Governance, rule of law, capable institutions are both outcome and enabler, advancing all three pillars of sustainable development and the post-2015 development agenda. Some areas could include:

a) effective, accountable and transparent institutions;
b) strengthening the rule of law at all levels;
c) provision of public services for all;
d) improvement of transparency in public finances management;
e) fighting corruption in all its forms;
f) improved public access to publicly owned information;
g) inclusive, participatory decision-making;
h) strengthening local governments;
i) strengthening of civil society;
j) freedom of media, association and speech;
k) curbing illicit financial flows;
l) provision of legal identity;
m) provision of property, use and access rights, to all persons;
n) providing access to independent and responsive justice systems;
o) developing and using evidence based, high quality, timely, disaggregated data and methodology for evaluating progress; and
p) appropriate means of implementation.

Goals and targets suggested by Member States, Major Groups and Other Stakeholders:

- Transparency of public institutions and improved access to the information and data owned by those institutions,
whether at local, regional or national level\textsuperscript{1402}; Guarantee the public’s right to information and access to government data\textsuperscript{1403}; Promoting information and education on a culture of non-violence\textsuperscript{1404}; By 2020, all stakeholders under a given SDG have access to official data, reports and on progress with ability to comment and challenge \textsuperscript{1405}; Transparent, accountable and effective institutions and public authorities, free from corruption\textsuperscript{1406}; Guarantee by law citizens the right to information about government data, including public profits, expenditures and on the budget\textsuperscript{1407}; Guarantee fundamental rights and liberties, universal access to fair, efficient, accountable and independent justice, security and police systems, freedom of expression and access to information and independent media. \textsuperscript{1408}; Provision of effective, transparent and accountable private and public institutions at all levels, including fair and equitable fiscal systems, fighting bribery and corruption, solving conflicts through dialogue and justice, fair and peaceful means, and guarantying access to public data and to information, especially related to public finance, natural resources management, weather and climate change\textsuperscript{1409}; Enact legislation on the right to Information with all actors cooperating to ensure access to and understanding of basic rights and entitlements, public expenditure and other information necessary to promote sustainable development, including independent community and civil society oversight processes, mechanisms and institutions\textsuperscript{1410}; Ensure effective, accountable and transparent institutions\textsuperscript{1411} Strengthen the capacity of national and local government institutions to

PROPOSALS FOR CROSS-CUTTING TARGETS:

Australia/Netherlands/UK propose to integrate inequality measures throughout the framework:

- Reducing poverty in all its dimensions
- Eliminating discrimination in laws, policies and practices, including those between women and men
- Reducing inequalities among social groups, including economic, social, political and environmental inequalities
- Empowering and inclusion of marginalized groups, including indigenous peoples, minorities, migrants, refugees, persons with disabilities, older persons, children and youth
- Ensuring equality of economic opportunities for all, including marginalized groups
- Strengthening social protection systems, and social protection floors as relevant
- Promoting differentially high per capita income growth at the bottom of the income distribution

AOSIS proposes to include climate change targets under different goals:

- Build resilience and adaptive capacity against the adverse impact of climate change and natural disaster in all countries, particularly the vulnerable countries.
- Close the pre 2020 mitigation gap to put the world on a path of achieving a goal of stabilizing temperature increase to below 1.5 degrees Celsius.
- Promote economic incentives for investments in low-carbon solutions.
- Increase investment in education and mass awareness on climate change.
- Protect marine and terrestrial carbon sink and coral reefs to ensure their climate and disaster reduction roles.
- Scaling up by two-fold investment in safe and clean renewable energy and infrastructure for developing countries, particularly those in special situation.
- Development and implementation of comprehensive risk management tools and facilities in all countries, particularly in vulnerable developing countries, such as LDCs and SIDS.
- World is on track not to exceed global warming of 1.5 degrees Celsius compared to pre-industrial temperatures.
• Increase the rate of investment in environmentally friendly infrastructure that strengthens the resilience and security of all countries, particularly the most vulnerable including SIDS, against the adverse impact of climate change and natural disasters.
