 local climate action and reporting

ICLEI
Local
 Governments
 for Sustainable
 Cities

As of October 2013, 414 cities and local governments, with a population of 438 million people in 45 countries, reported 836 climate and energy commitments, 4,208 mitigation and adaptation actions and 770 greenhouse gas inventories covering municipal operations and community activities that aggregate to an annual GHG emissions of 2.2 Giga tons of CO₂ equivalent.

*Non-verified data reported to cCCR as of October 2013.
 *Figures are based on the latest available inventories and rounded up.
 *A local government can be involved in of more than one initiative

Assuming;

- climate change will only be embedded in global SDGs

- a global climate regime, regardless of its effectiveness, can only enter into force only by 2020

a strong goal on sustainable urbanization can be one of the most effective, if not the only, assets to guarantee scaling-up, rapid action globally.
