

# PCSD PARTNERSHIP

A multi-stakeholder partnership for enhancing  
Policy Coherence for Sustainable Development

#SDGAction12066

## PROGRESS REPORT FOR 2017 HLPF

**Reporting year:** June 2016 – May 2017

**Status of the initiative:** On track

### 1. PROGRESS

#### *Achievement at a glance*

The PCSD Partnership is on an excellent track. It launched 60 initiatives that work towards enhancing policy coherence for sustainable development (SDG17.14). During 2016-17, it achieved 16 deliverables, 41 are in progress, 4 have been postponed, and 18 new deliverables were launched this year. The PCSD Partnership brings together 24 members operating in 17 countries with some of the partners having a global reach.

Since its launch in July 2016, the PCSD Partnership has been working through a web-based platform to share experiences and knowledge on the policy coherence challenges and opportunities of SDG implementation. Initial work has been organised around four themes: (A) evidence to inform coherent policy making, (B) institutional practices to enhance policy coherence, (C) integrated approaches to address the interconnected SDGs, and (D) quantitative and qualitative tools for tracking progress on policy coherence. The results of collective thinking from the first year will feature as a special chapter in the forthcoming OECD Publication: *Policy Coherence for Sustainable Development 2017 - Eradicating Poverty and Promoting Prosperity*.

#### *Challenges faced in implementation*

SDGs call for a new paradigm: applying their new vision of sustainable development and principles through 'old' strategies and instruments is a key challenge. Within this framework, for some institutions joining the PCSD Partnership a particular challenge is limited resources to develop specific work on policy coherence for sustainable development, including country case studies, or initiatives that could be applied and tested in one location for possible replication elsewhere (e.g. role of cooperatives), or capacity building. The PCSD Partnership, which is a knowledge-sharing partnership, has achieved core initiatives with no funding. It encourages potential partner institutions working on similar issues to exploit complementarities, add value to ongoing work and avoid duplication.

#### *Next Steps*

The PCSD Partnership will continue engaging governments, key stakeholders and the public to keep policy coherence for sustainable development (SDG17.14) on the agenda internationally and at national and local levels as an important means of implementation of the SDGs. The Partnership will

## PCSD PARTNERSHIP

A multi-stakeholder partnership for enhancing  
Policy Coherence for Sustainable Development

support and facilitate multi-stakeholder dialogues, webinars, as well as interactive learning events, including a high-level event followed by an interactive learning session on the occasion of the 2017 HLPF. The latter aims to test tools that enable policy-makers to analyse policy interactions as well as potential effects (on other countries and future generations), and to identify concrete measures to enhance policy coherence for SDG implementation. The Partnership will also support a consultation process on how best to update existing international instruments for promoting good institutional practices for policy coherence.

### 2. MEASURABLE OUTCOMES

#### *Beneficiaries:*

Beneficiaries include: members of the OECD network of national focal points for policy coherence for sustainable development as well as policy-makers and stakeholders working on SDG implementation, including governments, parliamentarians, international organisations, civil society organisations, academic institutions, and policy communities.

#### *How did they benefit?*

The PCSD Partnership is helping to strengthen capacities to enhance, apply and monitor policy coherence for SDG implementation. The work of the PCSD Partnership aims to support policy-makers and stakeholders to design policies that (i) integrate economic, social and environmental concerns, (ii) build on synergies among SDGs and targets, and (iii) consider their effects on the well-being of people in other countries and for future generations. It also aims to identify institutional practices which can lead to enhanced policy coherence, based on the experience from diverse country contexts in SDG implementation. Most members of the PCSD Partnership facilitate and engage in international meetings and discussions on SDG implementation to raise awareness among decision-makers on the importance of policy coherence for effectively addressing highly interconnected goals. The Partnership also facilitates the development of case studies, practical tools and guidance for understanding the integrated nature of SDGs and applying policy coherence in practice.

### 3. EXISTING DELIVERABLES

	Year	Description of deliverable	Status
		<b>OECD</b>	
1.	2017	Develop guidance and capacity building activities, launch pilots in interested partner countries and an online 'Coherence Monitor'	Delivered
2.	July 2016	Convene an international event to launch the PCSD Partnership (in the context of the 2016 HLPF), develop a synthesis report of country case studies, and create an online platform for the PCSD Partnership	Delivered
3.	May 2016	Organise a multi-stakeholder workshop, and develop preliminary country case studies and cross-cutting analysis	Delivered
4.	May 2016	Launch the PCSD Framework with thematic modules on food security, illicit financial flows and green growth; and develop	Delivered
