

IMPORTANT DATES :

Abstract Submission:	Before Mar 4, 2016
Notification of Acceptance :	On Apr 13, 2016
Paper Submission (Full Paper):	Before July 20, 2016
Conference Dates:	6 - 8 Sep 2016

Submission Method :

Please submit your paper by :
Website : www.ierek.com
or e-mail : ierek@ierek.com

Conference Secretariat :

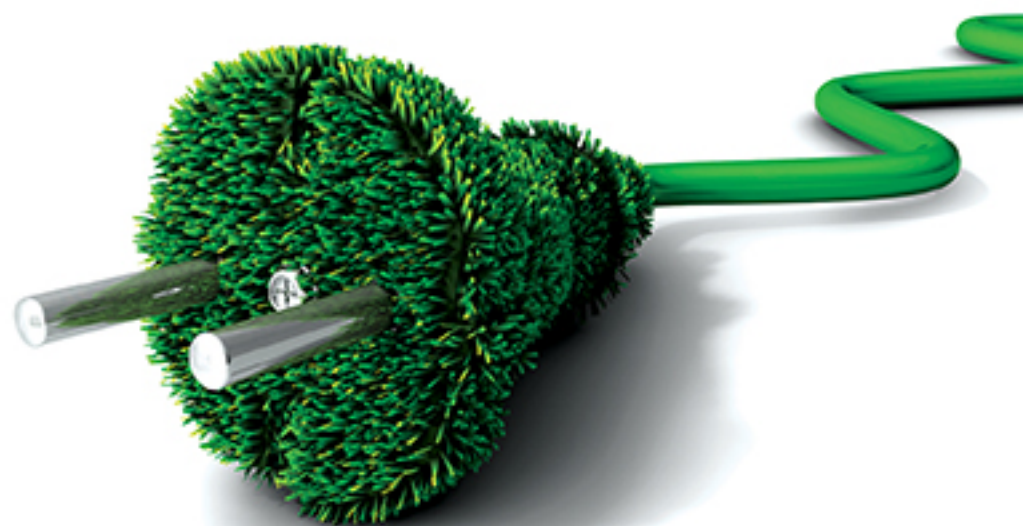

Basant Ashraf
basant@ierek.com
(+2) 010 2660 4949

Conference Chairperson :

Prof. Albena Yaneva
Professor of Architectural Theory.
Director of the Manchester
Architecture Research Centre
(MARC).
University of Manchester.

Conference Fees :

Includes conference
proceedings, other documentation
and refreshments .
Registration fees ,
Authors (Egyptians) : 1800 L.E
not Authors (Egyptians) : 1200 L.E
Authors (Non Egyptians) : 700 USD
not Authors (Non Egyptians) : 400 USD

Improving Sustainability Concept In Developing Countries

6 - 8
Sep 2016

Sharm El sheikh
Egypt

Improving Sustainability Concept in Developing Countries

The main goal of this conference is to enhance and spread the role of sustainable architecture in improving the quality of built environment in developing countries by saving energy, using renewable energy, using efficient sustainable building materials and other aspects that achieve the environmental efficiency.

In addition, the conference also emphasizes using energy performance simulation in the design process of sustainable architecture.

Using simulation tools facilitates achieving accurate and innovative results for studying energy consumption.

The target of this conference is to exchange knowledge and experience between architects, scientists engineers, environment experts, students and stake holders in order to develop our built environment and also innovate new approaches that contribute in improving sustainability in developing communities.

Benefits:

Attending conferences is very beneficial on the professional level. Conferences are full of people promoting new ideas which will expand your knowledge and undoubtedly help your career. You not only get to hear presentations but also converse with other researchers from different universities and even countries you may have only heard or read about. You learn from experts in the field. It is a great opportunity to find more about your field and listen to ideas that could help inspire research ideas of your own.

Not to mention, getting an overview of the place or city where the conference is being held and learning about its people and culture. Conferences also can expand your resources by providing a great opportunity to promote gathered information on new technologies related to your research. Moreover, they let

you test them out, share teaching tools and techniques, or even obtain samples of textbooks. It is an opportunity to engage with respectable professors and discuss with them the very latest research projects they could be working on. Delegates will have the choice of receiving the conference proceedings as either a hard cover book or in digital format on a USB flash drive. The USB flash drive will additionally contain proceedings from previous conferences in this series.

Puplication:

Participants who attend the conference events and wish to publish their research will be asked to submit an extended version of their paper for possible publication in IEREK International Journal.

Topics:

- Sustainable Urban Design.
- Mobility in Urban Design.
- Energy Consumption (in buildings and urban spaces.
- Energy Performance Simulation in Design Process.
 - Materials and Technology.
- Life Cycle Assessment for Materials.
 - Occupancy Comfort .
- Energy Efficiency in (heating – cooling – lighting.
 - Waste & Water Recycling.
- Economical Efficiency and Life Cycle Cost in Building.
- Education and Sustainability.
